Abstract	v
Zusammenfassung	vii
Contents	ix
<b>1 Introduction</b>	<b>1</b>
1.1 Outline and contributions	2
1.1.1 Part I: Approximate Dynamic Programming	2
1.1.2 Part II: Information theoretic problems	3
1.2 Publications	4
1.2.1 Other publications	5
<b>I Approximate Dynamic Programming</b>	<b>7</b>
<b>2 Linear programming in infinite-dimensional spaces</b>	<b>9</b>
2.1 Introduction	9
2.2 Infinite-dimensional LPs	10
2.3 Linear programming approach to MDPs	11
<b>3 Approximation of infinite-dimensional LPs</b>	<b>15</b>
3.1 Introduction	15
3.2 Semi-infinite approximation	17
3.3 Semi-infinite to finite programs: randomized approach	21
3.4 Semi-infinite to finite programs: structural convex optimization	27
3.5 Full infinite to finite programs	31
<b>4 Approximation of MDPs</b>	<b>33</b>
4.1 Introduction	33
4.2 Semi-infinite results in the MDP setting	34

4.3 Randomized results in the MDP setting	39
4.4 Structural convex optimization results in the MDP setting	41
4.5 Numerical examples	46
4.5.1 Example 1: truncated LQG	46
4.5.2 Example 2: A fisheries management problem	49
4.6 Unknown dynamics	51
4.6.1 Proof of Theorem 4.6.1	53
4.6.2 Numerical example	54
4.7 Infinite-horizon discounted-cost problems	57
<b>II Information theoretic problems</b>	<b>59</b>
<b>5 Channel capacity approximation</b>	<b>61</b>
5.1 Introduction	61
5.2 Discrete memoryless channel	64
5.2.1 Preliminaries	66
5.2.2 Capacity approximation scheme	68
5.2.3 Numerical example	76
5.3 Channels with continuous input and countable output alphabets	78
5.4 Quantum channel capacities	95
5.5 Appendix	95
5.5.1 Simulation details	95
<b>6 Generalized maximum entropy estimation</b>	<b>97</b>
6.1 Introduction	97
6.2 Problem statement	100
6.3 Relative entropy minimization	102
6.4 Finite-dimensional case	108
6.5 Gradient approximation	110
6.6 Zero-information moment closure method	111
<b>7 Conclusions and future directions</b>	<b>117</b>
7.1 Approximate Dynamic Programming	117
7.2 Information theoretic problems	118
7.2.1 Channel capacity approximation	118
7.2.2 Generalized maximum entropy estimation	119

Conclusions	117
Bibliography	120
Curriculum Vitae	133
