About the Special Issue Editor	v
Kazuyuki Takahashi Spin-Crossover Complexes doi: 10.3390/inorganics6010032	1
Keita Kuroiwa Supramolecular Control of Spin Crossover Phenomena Using Various Amphiphiles doi: 10.3390/inorganics5030045v	5
Hrishit Banerjee, Sudip Chakraborty, Tanusri Saha-Dasgupta Design and Control of Cooperativity in Spin-Crossover in Metal–Organic Complexes: A Theoretical Overview doi: 10.3390/inorganics5030047	22
Satoshi Kuramochi, Takuya Shiga, Jamie M. Cameron, Graham N. Newton and Hiroki Oshio Synthesis, Crystal Structures and Magnetic Properties of Composites Incorporating an Fe(II) Spin Crossover Complex and Polyoxometalates doi: 10.3390/inorganics5030048	40
Shiori Hora and Hiroaki Hagiwara High-Temperature Wide Thermal Hysteresis of an Iron(II) Dinuclear Double Helicate doi: 10.3390/inorganics5030049	48
Wasinee Phonsri, Luke C. Darveniza, Stuart R. Batten and Keith S. Murray Heteroleptic and Homoleptic Iron(III) Spin-Crossover Complexes; Effects of Ligand Substituents and Intermolecular Interactions between Co-Cation/Anion and the Complex doi: 10.3390/inorganics5030051	63
Akifumi Kimura and Takayuki Ishida Pybox-Iron(II) Spin-Crossover Complexes with Substituent Effects from the 4-Position of the Pyridine Ring (Pybox = 2,6-Bis(oxazolin-2-yl)pyridine) doi: 10.3390/inorganics5030052	77
Takumi Nakanishi, Atsushi Okazawa and Osamu Sato Halogen Substituent Effect on the Spin-Transition Temperature in Spin-Crossover Fe(III) Compounds Bearing Salicylaldehyde 2-Pyridyl Hydrazone-Type Ligands and Dicarboxylic Acids doi: 10.3390/inorganics5030053	89
Kazuyuki Takahashi, Takahiro Sakurai, Wei-Min Zhang, Susumu Okubo, Hitoshi Ohta, Takashi Yamamoto, Yasuaki Einaga and Hatsumi Mori Spin-Singlet Transition in the Magnetic Hybrid Compound from a Spin-Crossover Fe(III) Cation and π -Radical Anion doi: 10.3390/inorganics5030054	98
Takashi Kosone, Takeshi Kawasaki, Itaru Tomori, Jun Okabayashi and Takafumi Kitazawa Modification of Cooperativity and Critical Temperatures on a Hofmann-Like Template Structure by Modular Substituent doi: 10.3390/inorganics5030055	112

Akira Sugahara, Hajime Kamebuchi, Atsushi Okazawa, Masaya Enomoto and Norimichi Kojima Control of Spin-Crossover Phenomena in One-Dimensional Triazole-Coordinated Iron(II) Complexes by Means of Functional Counter Ions doi: 10.3390/inorganics5030050	120
Philipp Stock, Dennis Wiedemann, Holm Petzold and Gerald Hörner Structural Dynamics of Spin Crossover in Iron(II) Complexes with Extended-Tripod Ligands doi: 10.3390/inorganics5030060	143
Saki Iwai, Keisuke Yoshinami and Satoru Nakashima Structure and Spin State of Iron(II) Assembled Complexes Using 9,10-Bis(4-pyridyl)anthracene as Bridging Ligand doi: 10.3390/inorganics5030061	165
Alexander R. Craze, Natasha F. Sciortino, Mohan M. Badbhade, Cameron J. Kepert, Christopher E. Marjo and Feng Li Investigation of the Spin Crossover Properties of Three Dinuclear Fe(II) Triple Helicates by Variation of the Steric Nature of the Ligand Type doi: 10.3390/inorganics5040062	173
Kenta Imoto, Shinjiro Takano and Shin-ichi Ohkoshi Metal Substitution Effect on a Three-Dimensional Cyanido-Bridged Fe Spin-Crossover Network doi: 10.3390/inorganics5040063	187
