Summary 1

General Introduction 4

Aims of the Present Study 9

Research Questions and Outlines 11

General Conclusions 17

References 20

Chapter 1 Characterization of microsatellite loci in the Himalayan lichen Fungus Lobaria pindarensis (Lobariaceae) 24

Chapter 2 Genetic diversity and structure of the epiphytic foliose lichen Lobaria pindarensis in the Himalayas is dependent on elevation rather than land use type 34

Chapter 3 Distribution and national conservation status of the lichen family Lobariaceae (Peltigerales): from subtropical luxuriant forests to the alpine scrub of Nepal Himalaya 68

Chapter 4 Predicting the current distribution and climate change-induced range shift for the endemic epiphytic lichen Lobaria pindarensis in the Hindu Kush Himalayan region 99

Chapter 5 Trade and legislation: consequences for the conservation of lichens in the Nepal Himalaya 121

Chapter 6 Indigenous knowledge and use of lichens by the lichenophilic communities of the Nepal Himalaya 141
