| <b>Chapter 1: INTRODUCTION</b>   | <b>1</b> |
| <b>1. The four objectives of the PhD Thesis</b>  | <b>2</b> |
| Objective 1 – Question: How do protection times of specific mosquito repellents differ between field and laboratory experiments?   | 3        |
| Objective 2 – Question: Where in Switzerland are suitable sites for field experiments?   | 3        |
| Objective 3 – Questions: What is the protection of DEET and PMD in the field?<br>What is the corresponding protection of the same mosquito repellents in laboratory experiments? | 4        |
| Objective 4 – Question: Are there alternative methods for the WHO arm-in-cage test with improved predictive power?   | 5        |
| <b>2. Mosquitoes – biology and medical importance</b>  | <b>5</b> |
| 2.1 The biology of mosquitoes  | 5        |
| 2.2 Pathogen transmission  | 6        |
| 2.3 Six important mosquito species – Worldwide and for our studies   | 7        |
| <b>2.3.1 The three mosquito species used in our laboratory experiments</b>   | <b>7</b> |
| 1. <i>Anopheles stephensi</i>  | 7        |
| 2. <i>Aedes aegypti</i>  | 7        |
| 3. <i>Culex quinquefasciatus</i>   | 8        |
| <b>2.3.2 Three important mosquito species collected by the study participants during the field trials</b>  | <b>8</b> |
| 1. <i>Aedes vexans</i>   | 8        |
| 2. <i>Aedes geminus/cinereus</i>   | 8        |
| 3. <i>Anopheles plumbeus</i>   | 8        |
| 2.4 Tropical mosquitoes in Europe  | 9        |

|  |            |
|--|------------|
| <b>3. Mosquito repellents</b>  | <b>9</b>   |
| 3.1 Topical repellents   | 9          |
| 3.2 Recommended active ingredients in mosquito repellents  | 10         |
| <b>4. The Biocidal Products Regulation ((EU) No 528/2012 (BPR))</b>  | <b>11</b>  |
| <b>5. Guidelines for repellent testing</b>   | <b>12</b>  |
| 5.1 WHO Guidelines for laboratory and field experiments  | 12         |
| 5.2 US EPA Guidelines for laboratory and field experiments   | 13         |
| 5.3 Selection of the guidelines for the current study  | 15         |
| <b>Chapter 2: Comparison of field and laboratory efficacy studies of topical repellents – a systematic review</b>                        | <b>23</b>  |
| <b>Chapter 3: Mosquito diversity of the Nature Reserve Langholz, Canton of Aargau</b>  | <b>53</b>  |
| <b>Chapter 4: Evaluation of standard field and laboratory methods to compare protection times of the topical repellents PMD and DEET</b> | <b>81</b>  |
| <b>Chapter 5: A new air ventilation system for repellent testing with the WHO arm-in-cage test</b>                                       | <b>108</b> |
| <b>Chapter 6: GENERAL DISCUSSION AND CONCLUSIONS</b>   | <b>118</b> |
| 1. Discussion on Objective 1 – Review of studies with mosquito repellents  | 119        |
| 2. Discussion on Objective 2 – Field sites in Switzerland  | 123        |
| 3. Discussion on Objective 3 – Field and laboratory experiments with 18 participants   | 123        |
| 4. Discussion on Objective 4 – New air ventilation system  | 125        |
| Critical view  | 125        |
| <b>Chapter 7: Appendices</b>   | <b>133</b> |
| Flyer: Probanden gesucht!  | 134        |
| Information für die Studienteilnehmer  | 135        |
| Schriftliche Einverständniserklärung zur Studienteilnahme  | 142        |

|   |            |
