

## Table of contents

Summary .....	III
Acknowledgements .....	V
Table of contents .....	VI
List of figures .....	X
List of tables .....	XII
<b>1. Introduction .....</b>	<b>1</b>
1.1. Our nemesis, the Mosquito .....	1
1.2. Life cycle .....	2
1.2.1. Mating and blood feeding .....	3
1.2.2. Eggs and oviposition .....	5
1.2.3. Larvae .....	6
1.2.4. Pupae .....	6
1.2.5. The Adult .....	7
1.3. Why are mosquitoes important? .....	9
1.4. Mosquito control .....	10
1.5. Mosquito control today .....	11
1.5.1. Larval source management .....	11
1.5.1.1. Habitat modification .....	11
1.5.1.2. Habitat manipulation .....	12
1.5.1.3. Larviciding .....	12
1.5.1.4. Biological .....	13
1.5.2. Chemical control of adult mosquitoes .....	13
1.5.2.1. Indoor residual spraying (IRS) .....	14
1.5.2.2. Insecticide-treated nets (ITNs) .....	14
1.5.3. The problem of resistance .....	15
1.5.3.1. Insecticide resistance monitoring .....	16
1.5.4. The contribution of mathematical modelling to the control of vector borne diseases .....	17
1.5.5. Identified research questions .....	17
1.5.5.1. The problem? .....	17
1.5.5.2. The approach .....	18
1.6. Reference .....	19
<b>2. Comparability between insecticide resistance bioassays for mosquito vectors: time to review current methodology? .....</b>	<b>26</b>
2.1. Summary .....	27
2.2. Background .....	28
2.3. Methods .....	30
2.3.1. Literature review .....	30
2.3.2. Mosquito strains .....	30
2.3.3. Insecticides .....	31
2.3.4. CDC bottle assay .....	31
2.3.5. WHO susceptibility test .....	32
2.3.6. Data analysis .....	34
2.4. Results .....	35
2.4.1. Literature review .....	35

2.4.2. WHO susceptibility test vs. CDC bottle assay from present study .....	36
2.4.2.1. Comparison of mortality rates .....	36
2.4.2.2. Comparison of knockdown curves .....	37
2.4.2.3. 24 hours mortality as a function of time-to-knockdown .....	39
2.5. Discussion .....	40
2.6. Conclusion .....	44
2.7. Competing interests .....	44
2.8. Authors' contributions .....	44
2.9. Acknowledgements .....	44
2.10. References .....	45
<b>3. How important is the angle of tilt in the WHO cone bioassay? .....</b>	<b>48</b>
3.1. Abstract .....	49
3.2. Introduction .....	50
3.3. Methods .....	51
3.3.1. Mosquitoes .....	51
3.3.2. Insecticide treated nets .....	51
3.3.3. WHO cone bioassay .....	52
3.3.4. Washing procedure .....	53
3.3.5. Time spent in contact with the net .....	54
3.3.6. Data analysis .....	54
3.4. Results .....	55
3.4.1. Effect of angle on knockdown and mortality .....	55
3.4.2. Time spent in contact with the net .....	59
3.5. Discussion .....	61
3.6. Conclusion .....	64
3.7. Additional file .....	64
3.8. Authors' contributions .....	64
3.9. Acknowledgements .....	65
3.10. Competing interests .....	65
3.11. References .....	65
<b>4. Insecticide susceptibility of Anopheles mosquitoes changes in response to variations in the larval environment .....</b>	<b>68</b>
4.1. Abstract .....	69
4.2. Introduction .....	70
4.3. Results .....	72
4.4. Discussion .....	77
4.5. Methods .....	81
4.5.1. Mosquito colonies and standard rearing conditions .....	81
4.5.2. Larval rearing experiments .....	81
4.5.3. Measuring relationship between mortality and body weight .....	83
4.5.4. Data analysis .....	84
4.6. Acknowledgments .....	84
4.7. Author Contributions .....	85
4.8. Competing financial interests .....	85
4.9. Reference .....	85

<b>5. A mathematical model to estimate the effects of larval density on adult mortality</b>	<b>91</b>
5.1. Introduction.....	92
5.2. Methods and results .....	93
5.2.1. State variables and parameters .....	93
5.2.2. Equations.....	95
5.2.3. Step 1- ODE system when adult mortality is constant with larval density	95
5.2.4. Step 2- Integro-differential equations .....	97
5.3. Discussion and conclusion.....	98
5.4. References.....	99
<b>6. A multi-centre study on the WHO susceptibility assay .....</b>	<b>102</b>
6.1. Introduction.....	103
6.2. Methods .....	104
6.2.1. Study sites .....	104
6.2.2. Mosquitoes.....	104
6.2.3. Insecticides.....	105
6.2.4. Susceptibility assay .....	105
6.2.5. Data analysis .....	106
6.3. Results.....	106
6.4. Discussion.....	108
6.5. Conclusion .....	109
6.6. Acknowledgements.....	110
6.7. References.....	110
<b>7. Discussion.....</b>	<b>112</b>
7.1. Insecticide resistance testing bioassays .....	112
7.2. Breeding conditions .....	115
7.3. Inter laboratory differences.....	116
7.4. References.....	117
<b>8. Conclusion.....</b>	<b>120</b>
<b>9. Appendix 1 - STANDARD OPERATING PROCEDURE .....</b>	<b>122</b>
9.1. Introduction: .....	122
9.2. INSTRUCTIONS .....	123
9.3. Safety .....	123
9.4. Principle.....	123
9.5. Material and reagents.....	123
9.6. Method.....	124
9.6.1. Egg collection .....	124
9.6.2. Setting up the eggs .....	124
9.6.3. Feeding larvae .....	124
9.6.4. Setting up adult cage.....	125
9.6.5. Blood feeding.....	126
9.6.6. Breeding schedule.....	126
9.6.6.1. Schedule 1 .....	126
9.6.6.2. Schedule 2.....	127

9.6.7. Cleaning of larva trays .....	128
9.6.8. Disposal of mosquitoes .....	128
9.6.9. Precautions.....	128
9.6.10. Preparation of Reagents .....	129
9.6.10.1. Sugar solution .....	129
9.6.10.2. Dechlorinated water .....	129
<b>10. Curriculum Vitae .....</b>	<b>130</b>
