Zusammenfassung/Abstract ... 3

Introduction ... 8

- Oxygen and metazoan life ... 8
- Oxygen sensing, hypoxia and regulation of hypoxia-inducible factors ... 9
- HIF-mediated cellular responses to hypoxia ... 11
  - Normal development ... 11
  - Angiogenesis ... 12
  - Erythropoiesis ... 12
  - Glycolysis and mitochondrial metabolism ... 13
  - Modulation of cell proliferation, apoptosis and cell cycle ... 14
- HIF-independent responses to hypoxia ... 15
- Hypoxia, HIF and cancer ... 16
- The splicing process and alternative splicing ... 18
- Hypoxia, alternative splicing and cancer ... 22

Results ... 25

- HIF proteins are crucial to implement hypoxia-induced gene expression programs in PDAC ... 25
- Identification of hypoxia-inducible splicing events ... 29
- Hypoxia inducible splicing of SLC35A3 and FAM13A is dependent on HIF1 and HIF2 ... 34
- Human pancreatic cancer organoids recapitulate splicing of FAM13A and SLC35A3 ... 38
- Metabolic profiling of hypoxia inducible SLC35A3-long isoform ... 41

Discussion ... 44

Material & Methods ... 51

- General lab methods ... 51
  - RNA harvest and isolation ... 51

  - cDNA synthesis and quantitative real-time PCR ... 51
  - Protein harvest ... 52
  - Western Blotting ... 52
  - Seahorse ... 53
  - Immunofluorescent stainings ... 53
  - Proliferation assay ... 54
- Cell culture ... 54
  - Cell lines ... 55
  - Virus production & transduction ... 55
  - siRNA transfection ... 55
  - plasmid transfection ... 56
  - PDAC organoid line generation ... 56
  - Organoid culture ... 56
- Metabolomics ... 57
- Mass spectrometry ... 58
- RNA sequencing ... 60
  - RNA prep and sequencing ... 60
  - Data processing ... 60
  - Differential gene expression analysis ... 62
  - Gene ontology enrichment ... 62
  - SplAdder ... 62
  - TCGA analysis ... 63
  - Survival analysis ... 63
- Ingenuity pathway analysis ... 64

Supplementary data ... 65

- Supplementary figures ... 65
- Supplementary tables ... 74
