

# Contents

|  |           |
|--|-----------|
| Notation   | vii       |
| Abstract   | xiii      |
| Zusammenfassung  | xvii      |
| <b>1 Introduction</b>  | <b>1</b>  |
| 1.1 Antibiotics . . . . .  | 1         |
| 1.1.1 Definition and historical outline . . . . .  | 1         |
| 1.1.2 Classification and modes of action . . . . .   | 1         |
| 1.2 Antibiotic resistance . . . . .  | 3         |
| 1.2.1 Resistance mechanisms . . . . .  | 3         |
| 1.2.2 The role of the environment . . . . .  | 4         |
| 1.2.3 The food chain as resistance reservoir . . . . .   | 4         |
| 1.3 Irrigation water . . . . .   | 6         |
| 1.3.1 Water quality and regulations . . . . .  | 6         |
| 1.3.2 Surface waters . . . . .   | 7         |
| 1.4 The anthropogenic factor . . . . .   | 8         |
| 1.5 Antibiotic resistance determinants – how to get and share them . . .   | 9         |
| 1.5.1 Antibiotic resistance gene exchange among bacteria . . . . .   | 9         |
| 1.5.2 The founder effect . . . . .   | 12        |
| 1.5.3 A glimpse beyond the weapon-shield theory . . . . .  | 12        |
| 1.6 <i>E. coli</i> and <i>Enterococcus</i> spp. – commensals spreading resistance? . .   | 13        |
| 1.7 Aims of the study . . . . .  | 15        |
| References Introduction . . . . .  | 16        |
| <b>2 Manuscript 1: Dynamics of culturable mesophilic bacterial communities of three fresh herbs and their production environment (published)</b> | <b>27</b> |
| Abstract . . . . .   | 29        |

|   |           |
|---|-----------|
| Introduction . . . . .  | 29        |
| Materials and Methods . . . . .   | 31        |
| Bacterial growth conditions . . . . .   | 31        |
| Field and growth conditions . . . . .   | 31        |
| Field sampling . . . . .  | 31        |
| MALDI biotyping . . . . .   | 32        |
| 16S amplicon sequencing . . . . .   | 32        |
| Statistical analysis . . . . .  | 33        |
| Results . . . . .   | 33        |
| Organic fertilizers . . . . .   | 33        |
| Soil . . . . .  | 33        |
| Irrigation water . . . . .  | 33        |
| Herbs . . . . .   | 35        |
| Open field weather data . . . . .   | 36        |
| Bacterial isolates from different culture media . . . . .   | 36        |
| Bacterial isolates from the three production systems . . . . .  | 37        |
| Discussion . . . . .  | 37        |
| Organic fertilizers and soil . . . . .  | 37        |
| Plants – field and postharvest . . . . .  | 37        |
| Irrigation water: comparing two water sources . . . . .   | 40        |
| MALDI biotyping and mesophilic community composition . . . . .  | 41        |
| Acknowledgements . . . . .  | 42        |
| References Manuscript 1 . . . . .   | 42        |
| <b>3 Manuscript 2: Tracing back multidrug-resistant bacteria in fresh herb production: from chive to source through the irrigation water chain (submitted, revised)</b> | <b>47</b> |
| Abstract . . . . .  | 48        |
| Introduction . . . . .  | 49        |
| Materials and Methods . . . . .   | 52        |
| Bacterial culture conditions . . . . .  | 52        |
| Experimental setup and plant growth conditions . . . . .  | 53        |
| Field sampling and bacterial culture preparation . . . . .  | 54        |
| MALDI biotyping . . . . .   | 55        |
| Antibiotic susceptibility tests . . . . .   | 56        |

|  |            |
|--|------------|
| Phylogenetic groups (PG) . . . . .   | 57         |
| Multilocus sequence typing (MLST) . . . . .  | 57         |
| Whole-genome sequencing and bioinformatics . . . . .   | 58         |
| Biolog . . . . .   | 59         |
| Statistical analysis . . . . .   | 59         |
| Results . . . . .  | 60         |
| Greenhouse climatic conditions . . . . .   | 60         |
| Total HPC along the two irrigation water chains and on chive . . . . .   | 60         |
| ARB counts on chive plants . . . . .   | 62         |
| ARB species in the two systems . . . . .   | 63         |
| Antibiotic resistance profiling of target ARB . . . . .  | 64         |
| Tracing back MDR <i>E. coli</i> . . . . .  | 65         |
| Discussion . . . . .   | 68         |
| From generic to antibiotic-resistant bacteria . . . . .  | 68         |
| Species diversity of ARB and resistance profiles . . . . .   | 69         |
| MDR <i>E. coli</i> – from water to chive . . . . .   | 71         |
| Acknowledgements . . . . .   | 74         |
| References Manuscript 2 . . . . .  | 91         |
| <b>4 Manuscript 3: Antibiotic-resistant indicator bacteria in irrigation water: High prevalence of extended-spectrum <math>\beta</math>-lactamase (ESBL)-producing <i>Escherichia coli</i> (submitted)</b> | <b>103</b> |
| Abstract . . . . .   | 104        |
| Introduction . . . . .   | 105        |
| Materials and Methods . . . . .  | 108        |
| Water sampling and bacterial culture preparation . . . . .   | 108        |
| Bacterial culture conditions . . . . .   | 109        |
| MALDI biotyping . . . . .  | 109        |
| Antibiotic susceptibility tests . . . . .  | 110        |
| Phylogenetic groups . . . . .  | 111        |
| DNA extraction, sequencing, and bioinformatics . . . . .   | 111        |
| Results . . . . .  | 112        |
| Aerobic mesophilic counts, <i>E. coli</i> , and <i>Enterococcus</i> spp. . . . .   | 112        |
| Antibiotic-resistant <i>E. coli</i> and <i>Enterococcus</i> spp. . . . .   | 113        |
| Antibiograms of ESBL-producing <i>E. coli</i> and presumptive VRE . . . . .  | 114        |

|   |            |
|---|------------|
| Characterization of ESBL-producing <i>E. coli</i> . . . . . | 115        |
| Discussion . . . . .  | 118        |
| Highly prevalent ESBL-producing <i>E. coli</i> . . . . .    | 119        |
| Conclusions . . . . .                                       | 122        |
| Acknowledgements . . . . .                                  | 123        |
| References Manuscript 3 . . . . .                           | 136        |
| <b>5 Conclusion and Outlook</b>                             | <b>149</b> |
| <b>6 Acknowledgements</b>                                   | <b>153</b> |
| <b>7 Curriculum Vitae</b>                                   | <b>157</b> |
