<b>1 Acknowledgements</b>	<b>iii</b>
<b>2 Zusammenfassung</b>	<b>v</b>
<b>3 Summary</b>	<b>vii</b>
<b>4 Introduction</b>	<b>1</b>
4.1 Rabies: The disease, its transmission and control . . . . .	1
4.2 Mathematical modelling of rabies . . . . .	4
4.3 Rabies in N'Djamena . . . . .	7
4.4 Goals and objectives . . . . .	9
<b>5 Vaccination of dogs in an African city interrupts rabies transmission and reduces human exposure</b>	<b>11</b>
5.1 Abstract . . . . .	11
5.2 Introduction . . . . .	12
5.3 Results . . . . .	13
5.4 Discussion . . . . .	17
5.5 Materials and methods . . . . .	19
5.6 Supplementary materials . . . . .	28
<b>6 A metapopulation model of dog rabies transmission in N'Djamena, Chad</b>	<b>35</b>
6.1 Abstract . . . . .	35
6.2 Introduction . . . . .	35
6.3 Model description . . . . .	38
6.4 Model analysis . . . . .	40
6.5 Model calibration . . . . .	43
6.6 Numerical simulations and sensitivity analysis . . . . .	46
6.7 Discussion and conclusion . . . . .	50
<b>7 The importance of contact structures of dog populations for rabies transmission</b>	<b>53</b>
7.1 Abstract . . . . .	53
7.2 Author summary . . . . .	54
7.3 Introduction . . . . .	54
7.4 Materials and methods . . . . .	56
7.5 Results . . . . .	61
7.6 Discussion . . . . .	65
7.7 Supporting information . . . . .	67
<b>8 Discussion</b>	<b>73</b>
8.1 Developing models for rabies transmission in N'Djamena . . . . .	73
8.2 Implications for rabies control and elimination . . . . .	74
8.3 Future work . . . . .	78
<b>9 Conclusion</b>	<b>79</b>
<b>Bibliography</b>	<b>81</b>
<b>List of Figures</b>	<b>90</b>
<b>List of Tables</b>	<b>95</b>
<b>Curriculum Vitae</b>	<b>96</b>
