

ACKNOWLEDGEMENTS .....	2
ABSTRACT .....	3
ZUSAMMENFASSUNG .....	5
Abbreviations .....	7
List of figures .....	12
1 Introduction .....	14
1.1 Cartilage .....	15
1.1.1 Human ear and auricular cartilage .....	17
1.2 Microtia .....	18
1.2.1 Developmental factors and prevalence .....	18
1.2.2 Clinical grading of microtia .....	20
1.3 Clinical microtia reconstruction .....	21
1.3.1 Autologous costal reconstruction .....	22
1.3.2 Synthetic implant reconstruction .....	25
1.3.3 Prosthetic reconstruction .....	26
1.4 Tissue engineering .....	28
1.4.1 Cell sources .....	30
1.4.1.1 Allogeneic cell sources .....	30
1.4.1.2 Autologous cell sources .....	31
1.4.2 Biomaterials .....	32
1.4.2.1 Thermoplastic polymers .....	33
1.4.2.2 Hydrogels .....	34
1.4.2.3 Crosslinking mechanisms of biomaterials .....	37
1.4.3 Manufacturing techniques .....	38
1.4.3.1 Casting .....	39
1.4.3.2 Bioprinting .....	40
1.4.4 Bioink requirements in bioprinting processes .....	42
1.4.4.1 Rheology .....	43
1.4.4.2 Mechanical properties and integrity .....	44
1.5 Tissue engineering approaches in auricular cartilage reconstructions .....	44
2 Scope of the thesis .....	46
2.1 Objectives .....	47
2.2 Project summary .....	47
2.2.1 A versatile bioink for three-dimensional printing of cellular scaffolds based on thermally and photo-triggered tandem gelation (Chapter 3) .....	47
2.2.2 Bioprinting complex cartilaginous structures with clinically compliant biomaterials (Chapter 4) .....	47
2.2.3 Internally reinforced bioprinted cartilage constructs (Chapter 5) .....	48
2.2.4 In vivo evaluation of bioprinted cartilage constructs (Chapter 6) .....	48
2.2.5 Guidelines for standardization of bioprinting: A systematic study of process parameters and their effect on bioprinted structures (Chapter 7) .....	48
3 A versatile bioink for three-dimensional printing of cellular scaffolds based on thermally and photo-triggered tandem gelation .....	50
Abstract .....	51
3.1 Introduction .....	51
3.2 Materials and methods .....	53
3.2.1 Materials .....	53
3.2.2 Material characterization .....	55
3.2.3 Cell culture and encapsulation .....	55
3.3 Results .....	57
3.3.1 Bioink characterization .....	57
3.3.2 Bioprinting of constructs .....	60
3.3.3 Cell viability .....	61

3.4 Discussions .....	63
3.5 Conclusions .....	66
3.6 Acknowledgements .....	66
3.7 Supplementary data .....	67
4 Bioprinting complex cartilaginous structures with clinically compliant biomaterials .....	68
Abstract .....	70
4.1 Introduction .....	70
4.2 Materials and methods .....	72
4.2.1 Bioprinting preparation .....	72
4.2.2 Bioink characterization .....	73
4.2.3 Biological analysis of the grafts .....	75
4.3 Results .....	75
4.3.1 Bioink characterization .....	75
4.3.2 Bioprinted structures .....	77
4.3.3 Bioink biocompatibility .....	78
4.3.4 Magnetic resonance imaging .....	81
4.4 Discussions .....	83
4.5 Conclusions .....	85
4.6 Acknowledgements .....	85
4.7 Supplementary data .....	86
5 Internally reinforced bioprinted cartilage constructs .....	88
Abstract .....	89
5.1 Introduction .....	89
5.2 Materials and methods .....	90
5.2.1 Materials preparation and bioprinting .....	90
5.2.2 In vivo experiments and sample evaluation .....	91
5.3 Results and discussion .....	93
5.3.1 Hydrogel composites with enhanced mechanical properties .....	95
5.3.2 Bioink supports cartilage formation in vivo .....	97
5.4 Conclusions .....	101
5.5 Acknowledgements .....	102
5.6 Supplementary data .....	102
6 In vivo evaluation of bioprinted cartilage constructs .....	104
Abstract .....	105
6.1 Introduction .....	105
6.2 Materials and methods .....	106
6.2.1 Materials preparation .....	106
6.2.2 In vivo study series and conditions .....	107
6.2.3 Analysis techniques .....	108
6.3 Results .....	109
6.3.1 Bioink supports early cartilage formation in vivo .....	109
6.3.2 Stable in vivo cartilage was observed in the bioink graft over 16 weeks .....	112
6.4 Discussions .....	118
6.5 Conclusions .....	119
6.6 Acknowledgements .....	119
6.7 Supplementary data .....	120
7 Guidelines for standardization of bioprinting: a systematic study of process parameters and their effect on bioprinted structures .....	122
Abstract .....	123
7.1 Introduction .....	123
7.2 Results .....	126

7.2.1 Printing parameters are important.....	126
7.2.2 Commercial bioink comparison and standard testing .....	128
7.2.3 Crosslinking affect to mechanical properties.....	129
7.3 Discussion .....	131
7.4 Materials and Methods.....	134
7.4.1 Bioprinting preparations .....	134
7.4.2 Testing methods and analysis .....	135
7.5 Acknowledgements.....	136
7.6 Supplementary data.....	137
8 Outlook .....	142
8.1 Bioprinting needs standards.....	143
8.2 Future directions in bioprinting.....	143
8.3 Bioprinting in clinical realm .....	145
Bibliography .....	146
Curriculum vitae .....	170
