

Table of contents

Abstract	1
Zusammenfassung	4
Chapter 1	7
Introduction	
Chapter 2	33
Untargeted metabolomics unravels functionalities of phosphorylation sites in <i>Saccharomyces cerevisiae</i>	
Chapter 3	79
Crosstalk of posttranslational modifications allows differential regulation of metabolic enzymes activity	
Chapter 4	113
Extensive enzyme activity regulation by phosphorylation in <i>E. coli</i>	
Concluding remarks	149
Acknowledgements	161
Curriculum Vitae	163
