ABSTRACT	vii
ZUSAMMENFASSUNG	ix
ACKNOWLEDGMENTS	xi
ABBREVIATIONS	xiii
1 COMPLEXITY AND UNCERTAINTY: CHALLENGES FOR COMPUTATIONAL CHEMISTRY	1
2 COMPUTATIONAL CHEMISTRY FROM A NETWORK PERSPECTIVE	5
2.1 Exploration of Chemical Reaction Networks	6
2.2 Determination of Rate Constants from First Principles	12
2.3 Kinetic Modeling of Reactive Chemical Systems	14
3 COMPUTATIONAL CHEMISTRY FROM A STATISTICAL PERSPECTIVE	25
3.1 Statistical Calibration of Parametric Property Models	25
3.2 Uncertainty Classification	27
3.3 Prediction Uncertainty from Resampling Methods	31
4 MECHANISM DEDUCTION FROM NOISY CHEMICAL REACTION NETWORKS	37
4.1 Kinetic Modeling of Complex Chemical Reaction Networks	38
4.2 Overview of the KiNETX Meta-Algorithm	40
4.3 Automatic Network Generation	41
4.4 Hierarchical Network Reduction	42
4.5 Propagation of Free-Energy Uncertainty	48
4.6 Analysis of Kinetic Sensitivity to Free-Energy Uncertainty	49
4.7 Integration of Stiff Ordinary Differential Equations	51
4.8 Exemplary Workflow of the KiNETX Meta-Algorithm	52
4.9 Accuracy and Efficiency of KiNETX-Based Kinetic Modeling	55
4.10 KiNETX as a Guide for Reaction Space Exploration	58
4.11 Conclusions	60
5 RELIABLE ESTIMATION OF PREDICTION UNCERTAINTY FOR PHYSICO-CHEMICAL PROPERTY MODELS	61
5.1 Isomer Shift Calibration in Theoretical ^{57}Fe Mössbauer Spectroscopy	62
5.2 Reference Set of Molecular Iron Compounds	63
5.3 Effect of Experimental Uncertainty on Model Parameters	64
5.4 Model Selection Based on Occam's Razor	68
5.5 Assessment of Data Inconsistency Based on Jackknife-after-Bootstrapping	69

5.6	How Reliable are Density Functional Rankings Based on a Specific Data Set?	76
5.7	Effect of Exact Exchange on Model Prediction Uncertainty	80
5.8	Conclusions	83
6	CASE STUDY: THERMOCHEMICAL, KINETIC, AND SPECTROSCOPIC MODELING OF IRON PORPHYRIN CARBENE CHEMISTRY	87
6.1	Thermochemical Analysis of Iron Porphyrin Carbene Reactivity	87
6.2	Density Functional Assessment Based on Kinetic Modeling	105
6.3	Mössbauer Spectroscopy for the Discrimination of Spin-Charge States	111
7	A COMPUTATIONAL PERSPECTIVE ON THE STUDY OF COMPLEX CHEMICAL SYSTEMS	115
	APPENDIX A KINETIC MODELING OF COMPLEX REACTIONS: TECHNICAL DETAILS	119
	A.1 Computational Singular Perturbation	119
	A.2 Construction of Random Covariance Matrices	122
	A.3 Encoding Chemical Logic into Network Graphs	123
	APPENDIX B ^{57}Fe MÖSSBAUER ISOMER SHIFT PREDICTION: TECHNICAL DETAILS	125
	B.1 Statistical Calibration Analysis	125
	B.2 Quantum Chemical Calculations	128
	REFERENCES	131
	PUBLICATIONS	153
	CURRICULUM VITAE	155
