| Abstract | 1 |
| Executive Summary | 10 |
| Contents | 8 |
| Chapter 1 Introduction | 10 |
| 1.1 Motivation | 10 |
| 1.2 Specific Work | 10 |
| 1.3 Outline of the Thesis | 10 |
| Chapter 2 Background | 10 |
| 2.1 Introduction | 10 |
| 2.2 Substrate Fabrication, Cell Culture & Imaging | 17 |
| 2.3 Calculating the Displacement Field | 10 |
| 2.4 Traction Calculation | 10 |
| 2.4.1 General Problem Formulation | 10 |
| 2.4.2 Inverse TFM | 10 |
| 2.4.3 Direct TFM & Risk TFM | 17 |
| 2.4.4 Model-based TFM | 17 |
| 2.5 Simulation & Validation | 10 |
| 2.5.1 Force Calibration | 10 |
| 2.5.2 Including the Displacement Calibration | 10 |
| 2.6 Conclusion | 11 |
| Chapter 3 Design and Development of a Novel Simulation and Validation Pipeline for 2D and 3D Microfluidic Traction Force Microscopy | 10 |
| 3.1 Introduction | 10 |
| 3.2 Workflow | 10 |
| 3.2.1 Overview | 10 |
| 3.2.2 Fluid Element Simulation of Displacements | 17 |
| 3.2.3 Synthetic Image Engineering | 17 |
| 3.2.4 Ideal Displacement Field | 10 |
| 3.2.5 TFM Validation and Error Quantification | 10 |

| | | |
|------------------|--|-----------|
| 3.2.6 | Displacement Evaluation..... | 41 |
| 3.3 | Modifications for 3D TFM..... | 44 |
| 3.3.1 | Image Generation..... | 45 |
| 3.3.2 | Numerical Model Setup..... | 46 |
| 3.3.3 | Evaluation..... | 47 |
| 3.4 | Results..... | 47 |
| 3.4.1 | Evaluation of the Finite Element Model..... | 47 |
| 3.4.2 | Fourier Transform Traction Cytometry using and ideal Displacement Field..... | 49 |
| 3.4.3 | TFM Evaluation including Bead Tracking..... | 50 |
| 3.4.4 | TFM Evaluation on Two Neighboring Focal Adhesions..... | 52 |
| 3.5 | 3D TFM Evaluation Results..... | 54 |
| 3.5.1 | Displacement Analysis..... | 54 |
| 3.5.2 | Traction Analysis..... | 54 |
| 3.6 | Discussion..... | 54 |
| Chapter 4 | High-resolution Traction Force Microscopy on Small Focal Adhesions - Improved Accuracy through Optimal Marker Distribution and Optical Flow Tracking..... | 57 |
| 4.1 | Abstract..... | 58 |
| 4.2 | Introduction..... | 58 |
| 4.3 | Material and Methods..... | 60 |
| 4.3.1 | Synthetic Image Generation..... | 60 |
| 4.3.2 | Displacement Analysis..... | 61 |
| 4.3.3 | Force Reconstruction..... | 61 |
| 4.3.4 | Traction force microscopy on polyacrylamide gels:..... | 62 |
| 4.3.5 | Evaluation Metrics..... | 62 |
| 4.4 | Results..... | 63 |
| 4.4.1 | Optical flow feature tracking is orders of magnitude faster than PIV and substantially improves traction reconstruction, especially for small adhesions..... | 63 |
| 4.4.2 | 2D TFM always underestimates true traction forces, particularly for small adhesions..... | 64 |
| 4.4.3 | Higher density bead distribution on the surface improves spatial resolution..... | 65 |
| 4.4.4 | Traction magnitude has no influence on error, except for extreme traction levels..... | 68 |
| 4.4.5 | Experimental TFM confirms <i>in silico</i> results..... | 68 |
| 4.5 | Discussion..... | 69 |
| 4.6 | Supplementary Material..... | 72 |
| Chapter 5 | Force Direction Matters: A Complex Relationship between Metastatic Potential and In Vitro Mechanical Properties of Osteosarcoma Cells..... | 77 |
| 5.1 | Abstract..... | 78 |
| 5.2 | Introduction..... | 78 |
| 5.3 | Material and Methods..... | 78 |

| | | |
|------------------|--|-----------|
| 5.3.1 | Cell Culture..... | 78 |
| 5.3.2 | Substrate Preparation..... | 79 |
| 5.3.3 | Immunofluorescence, Image Acquisition and Segmentation..... | 79 |
| 5.3.4 | Indentation-type Atomic Force Microscopy..... | 80 |
| 5.3.5 | Real-Time Deformation Cytometry..... | 80 |
| 5.3.6 | Tensile Testing..... | 80 |
| 5.3.7 | Traction Force Microscopy..... | 81 |
| 5.3.8 | Micropillar-based TFM..... | 81 |
| 5.3.9 | Data Representation and Statistical Analysis..... | 81 |
| 5.4 | Results..... | 81 |
| 5.4.1 | High and low metastatic osteosarcoma cells display large morphological differences..... | 81 |
| 5.4.2 | Indentation-derived cell stiffness of adherent cells follows divergent trends in both osteosarcoma model pairs..... | 84 |
| 5.4.3 | In free-floating state, highly metastatic osteosarcoma cells are softer than the less metastatic counterparts..... | 84 |
| 5.4.4 | High metastatic cells display slightly higher tensile stiffness values..... | 85 |
| 5.4.5 | Highly metastatic cells show reduced contractility..... | 85 |
| 5.5 | Discussion..... | 86 |
| Chapter 6 | Biomaterial Surface Energy Driven Ligand Assembly Strongly Regulates Stem cell Mechanosensitivity and Fate on Very Soft Substrates..... | 89 |
| 6.1 | Abstract..... | 90 |
| 6.2 | Introduction..... | 90 |
| 6.3 | Materials and Methods..... | 91 |
| 6.3.1 | Tunable Surface Energy PDMS Substrate Preparation..... | 91 |
| 6.3.2 | Mechanical Characterization..... | 91 |
| 6.3.3 | Ligand Loading and Adsorbed Protein Quantification..... | 91 |
| 6.3.4 | Atomic Force Microscopy Imaging of Ligand Topography/Roughness..... | 91 |
| 6.3.5 | Cell Culture..... | 91 |
| 6.3.6 | Cell Attachment and Morphology..... | 92 |
| 6.3.7 | Cell Differentiation Quantification..... | 92 |
| 6.3.8 | Microscopy and image analysis..... | 92 |
| 6.3.9 | Real Time and Quantitative PCR..... | 92 |
| 6.3.10 | Phosphorylated ROCK quantification..... | 92 |
| 6.3.11 | Traction Force Microscopy..... | 92 |
| 6.3.12 | Time-of-Flight Secondary Ion Mass Spectrometry..... | 93 |
| 6.3.13 | Statistical analysis..... | 94 |
| 6.4 | Results..... | 94 |
| 6.4.1 | Surface energy driven collagen assembly is consistent across different PDMS stiffness..... | 94 |

| | | |
|---|---|------------|
| 6.4.2 | Surface energy regulates cell adhesion and dominates substrate stiffness | 94 |
| 6.4.3 | Surface energy directs stem cell differentiation | 95 |
| 6.4.4 | Surface energy affects cell contractility | 97 |
| 6.4.5 | Surface energy alters gene expression of collagen receptors and focal adhesion elements | 98 |
| 6.4.6 | Coating with a minimal collagen synthetic peptide rescues mesenchymal stem cell sensitivity to PDMS stiffness | 98 |
| 6.5 | Discussion | 99 |
| 6.6 | Supplementary Material | 101 |
| Chapter 7 | Simulation and Evaluation of 3D Traction Force Microscopy | 109 |
| 7.1 | Abstract | 110 |
| 7.2 | Introduction | 110 |
| 7.3 | Traction Force Microscopy in Three Dimensions | 111 |
| 7.3.1 | Measurement of substrate deformation | 111 |
| 7.3.2 | Traction Stress Reconstruction | 112 |
| 7.4 | Simulation Platform | 113 |
| 7.4.1 | Finite Element Model | 113 |
| 7.4.2 | Image Generation | 113 |
| 7.4.3 | Simulation Setup & Error Metrics | 113 |
| 7.5 | Results | 114 |
| 7.5.1 | Displacement Measurement | 114 |
| 7.5.2 | Traction Reconstruction | 114 |
| 7.6 | Discussion | 115 |
| 7.7 | Supplementary Material | 116 |
| Chapter 8 | Synthesis & Conclusion | 119 |
| 8.1 | Summary of Achievements | 119 |
| 8.2 | Limitation and Future Directions | 121 |
| 8.3 | Conclusions | 128 |
