

Contents

Busker Robot: A Robotic Painting System for Rendering Images into Watercolour Artworks	1
Lorenzo Scalera, Stefano Seriani, Alessandro Gasparetto, and Paolo Gallina	
A Simple and General Closed-Form Method for Direct Kinematics of Mechanism Based on SOC Modeling	9
Huiping Shen, Ke Xu, Guanglei Wu, and Ting-li Yang	
Development of LARMBot 2, A Novel Humanoid Robot with Parallel Architectures	17
Matteo Russo, Daniele Cafolla, and Marco Ceccarelli	
A Two-Step Algorithm for the Dynamic Reduction of Flexible Mechanisms	25
A. Cammarata, R. Sinatra, and P. D. Maddio	
A Variable Stiffness Robotic Arm Using Linearly Actuated Compliant Parallel Guided Mechanism	33
R. Hu, V. Venkiteswaran, and H.-J. Su	
Development of a Sensing System for Zero Gravity Simulation Using a Robot Manipulator to Test Antenna Reflector Unfolding in Satellites	41
S. D'Attanasio and J. Charron	
Underactuated Finger Behavior Correlation Between Vision System Based Experimental Tests and Multibody Simulations	49
Chiara Cosenza, Vincenzo Niola, and Sergio Savino	
Unified Pose Parametrization for 1T2R Parallel Manipulators	57
Yuanqing Wu and Marco Carricato	

Synthesis of Cartesian Manipulator of a Class RoboMech	69
Zh. Baigunchekov, S. Ibrayev, M. Izmambetov, T. Baigunchekov, B. Naurushev, and A. Mustafa	
A Modular Cable-Driven Surgical Robot with a Safe Joint Design	77
Carl A. Nelson	
A Novel Kinematic Model of Spatial Five-Bar Linkage PPSPS for Testing Accuracy of Two-Axis Moving Table with Ball-Bar	85
Xiaopeng Li, Zhi Wang, Huimin Dong, Shudong Yu, and Delun Wang	
Dynamic Modeling of Flexural Beams with Combined Loads in Compliant Mechanisms	93
Y. Yu and Q. Xu	
Kinematic Analysis of a 3-RRR Spherical Parallel Mechanism with Configurable Base	101
T. Essomba, M. A. Laribi, Y. Hsu, and S. Zeghloul	
Workspace and Cuspidality Analysis of a 2-X Planar Manipulator	110
Matthieu Furet and Philippe Wenger	
A Gripper Mechanism to Automate Overload Process for Fuel Elements	118
S. Kaimov, Ab. T. Kaimov, A. T. Kaimov, M. Ceccarelli, T. Kaiym, G. Kaimova, A. Jomartov, and E. Temirbekov	
Preloaded Structures for Space Exploration Vehicles	129
S. Seriani, L. Scalera, A. Gasparetto, and P. Gallina	
A Tooth Profile Design Method for Harmonic Drive Without Tip Interference	138
H. Dong, J. Zhang, and D. Wang	
Design of V2SOM: The Safety Mechanism for Cobot's Rotary Joints	147
Y. Ayoubi, M. A. Laribi, S. Zeghloul, and M. Arsicault	
Redesign and Construction of a Low-Cost CaPaMan Prototype	158
O. Arslan, S. B. Karaahmet, Ö. Selvi, D. Cafolla, and M. Ceccarelli	
A Novel SMA Driven Compliant Rotary Actuator Based on Double Helical Structure	166
Rasheed Kittinanthapanya, Yusuke Sugahara, Daisuke Matsuura, and Yukio Takeda	
Real Time Redundancy-Based Approach to Robot-Patient Safe Enhancement: Application to Doppler Sonography	174
C. Préault, M. A. Laribi, M. Arsicault, and S. Zeghloul	

Geometric Loci for the Kinematic Analysis of Planar Mechanisms via the Instantaneous Geometric Invariants	184
G. Figliolini and C. Lanni	
Comparison of Workspace Analysis for Different Spherical Parallel Mechanisms	193
Divya Shah, Giorgio Metta, and Alberto Parmiggiani	
A Proposed Software Framework for Studying the Grasp Stability of Underactuated Fingers	202
Giovanni Antonio Zappatore, Giulio Reina, and Arcangelo Messina	
Workspace Analysis and Dimensional Synthesis of the PRRS-RRC Shoenflies-Motion Generator	211
H. Simas and R. Di Gregorio	
Homogenization of the Jacobian Matrix of Manipulators by Using Inertial Parameters	219
J. A. Pamanes and H. A. Moreno	
Type Synthesis of Kinematically Redundant Parallel Manipulators Based on the HEXA Parallel Robot	227
Raymundo Ramos Alvarado and Eduardo Castillo Castañeda	
A Look-Ahead Trajectory Planning Algorithm for Spray Painting Robots with Non-spherical Wrists	235
Giulio Trigatti, Paolo Boscaroli, Lorenzo Scalera, Daniele Pillan, and Alessandro Gasparetto	
Performance Evaluation of an LQG Controller of a Robotic Link with Fractional Dampers Based on Their Integer-Order Approximation	243
Daniele Casagrande, Wiesław Krajewski, Stefano Miani, and Umberto Viaro	
Dynamic Modeling and Experimental Validation of a Haptic Finger Based on a McKibben Muscle	251
Walter Franco, Daniela Maffiodo, Carlo De Benedictis, and Carlo Ferraresi	
Preliminary Investigation of Static and Dynamic Properties of SLM Lattice Structures for Robotic Applications	260
M. Sortino, G. Totis, F. Scalzo, and E. Vaglio	
Energy Saving in Redundant Robotic Cells: Optimal Trajectory Planning	268
Paolo Boscaroli and Dario Richiedei	

A Novel Approach for Antiresonance Assignment in Undamped Vibrating Systems	276
R. Belotti, D. Richiedei, and I. Tamellini	
Chopstick-type Gripper Mechanism for Meal-Assistance Robot Capable of Adapting to Size and Elasticity of Foods	284
T. Oka, D. Matsuura, Y. Sugahara, J. Solis, A. L. Lindborg, and Y. Takeda	
A Novel Collision Avoidance Method for Serial Robots	293
Matteo Bottin, Giovanni Boschetti, and Giulio Rosati	
Functional Design of a Biomimetic Flapper	302
D. Costa, G. Palmieri, D. Scaradozzi, and M. Callegari	
Design Process of a New Lighting Robotic Arm for Operating Room	310
Juan Sandoval, Laurence Nouaille, Gérard Poisson, Yves Parmantier, and Benoit Magnain	
Hun Yi - A Spherical Pointing and Measuring Instrument Invented in Ancient China	318
Yingwei Guo, Zhijiang Xie, and Shaoping Bai	
Dynamic Study of an Adaptive Intelligent Cervical Brace Model Under Actuation	327
E.-Ch. Lovasz, C. M. Gruescu, A. M. Vutan, and D. T. Margineanu	
Towards a Safe Physical Human-Robot Interaction for Tele-Operated System: Application to Doppler Sonography	335
Juan Sandoval, Med Amine Laribi, Said Zeghloul, and Marc Arsicault	
Coupling Mechanisms for Multi-Fingered Robotic Hands with Skew Axes	344
Taher Deemyad, Neda Hassanzadeh, and Alba Perez-Gracia	
Design and Dynamic Modeling of a Novel Single-Wheel Pendulum Robot	353
Mario E. Herrera-Cordero, Manuel Arias-Montiel, and Esther Lugo-González	
Intuitive Hand Guidance of a Force-Controlled Sensitive Mobile Manipulator	361
Matthias Weyrer, Mathias Brandstötter, and Damir Mirkovic	
Social Humanoid Robot SARA: Development and Realization of the Shrug Mechanism	369
M. Penčić, M. Čavić, B. Borovac, and Z. Lu	

Development of Hand Exoskeleton Prototype for Assisted Rehabilitation	378
B. A. De la Cruz-Sánchez, M. Arias-Montiel, and E. Lugo-González	
Application of a Parametric Modal Analysis Approach to Flexible-Multibody Systems	386
Ilaria Palomba, Renato Vidoni, and Erich Wehrle	
In-Operation Structural Modification of Planetary Gear Sets Using Design Optimization Methods	395
Erich Wehrle, Ilaria Palomba, and Renato Vidoni	
A Robot for Welding Inspection in Offshore Mooring Chains	406
A. Hernandez, O. Altuzarra, V. Petuya, Ch. Pinto, and E. Amezuza	
Agri_q: Agriculture UGV for Monitoring and Drone Landing	413
G. Quaglia, P. Cavallone, and C. Visconte	
A Fail-Safe Operation Strategy for LAWEX (LARM Wire Driven EXercising Device)	424
G. Boschetti, G. Carbone, and C. Passarini	
Underactuated Elements Design Criterion for Envelop Gripper Mechanism	432
Shuangji Yao, Marco Ceccarelli, and Zhen Lu	
AXO-SUIT - A Modular Full-Body Exoskeleton for Physical Assistance	443
Simon Christensen, Shaoping Bai, Sajid Rafique, Magnus Isaksson, Leonard O'Sullivan, Valerie Power, and Gurvinder Singh Virk	
Author Index	451
