

Table of Contents

Abbreviation	5
Abstract	7
Introduction	9
The Burden of Chronic Obstructive Pulmonary Disease	9
Pathophysiology of COPD	11
Risk factors for the development of COPD	12
Evaluation of the patient with suspected COPD	13
The ABCD classification	17
Therapy of COPD	18
COPD Exacerbation	20
The impact of adherence to COPD therapies on lung function and health-related quality of life (HRQOL)	21
The Adherence Trial	22
Aim of this study	24
Method	25
Study participants	25
Study flow and procedures	26
Data collection	27
Statistical Analysis	28
Results	30
Baseline characteristics	30
Association of lung function parameters and functional scores at baseline	32
Lung function and HRQOL during the course of the study	33
Impact of group assignment and time in the study on lung function and HRQOL	36
Impact of adherence on lung function and HRQOL	39
Associations between changes in lung function and HRQOL	40

Discussion	44
COPD exacerbations in the ADHERENCE Trial	45
Lung function in the Adherence Trial	45
Lung function and HRQOL	46
Adherence and HRQOL	47
Limitations of the study	48
Conclusion	48
Reference	50
Acknowledgment	59
