<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Phase variation in bacteria . . . . .	1
1.2	The <i>agn43</i> stochastic switch in <i>Escherichia coli</i> . . . . .	4
1.3	Mathematical modelling of biological regulatory networks . . . . .	7
1.4	Contributions and outline of the thesis . . . . .	8
<b>2</b>	<b>To switch or not to switch: Quantifying switching of phase-varying systems</b>	<b>11</b>
2.1	Reporting the activity of the phase-varying <i>agn43</i> promoter . . . . .	11
2.2	State-of-the-art method for estimating switching frequencies . . . . .	13
2.3	Following population structure over time with flow cytometry . . . . .	16
2.3.1	Population dynamics analysis . . . . .	18
2.4	Bridging terminologies and definitions . . . . .	22
2.5	Chapter discussion . . . . .	26
<b>3</b>	<b>Direct experimental observation and stochastic modelling of <i>agn43</i> phase variation in single-cells</b>	<b>29</b>
3.1	Fluorescence cell-lineages with time-lapse microscopy . . . . .	29
3.2	Estimating switching probabilities from the data . . . . .	34
3.2.1	Estimating OFF-ON switching probability . . . . .	35
3.2.2	Simulating switching events with the reporter . . . . .	37
3.2.3	Estimating ON-OFF switching probability . . . . .	39
3.3	Stochastic model of <i>agn43</i> regulation . . . . .	41
3.3.1	Model description . . . . .	41
3.3.2	Using the model for <i>agn43</i> system analysis . . . . .	44
3.4	Chapter discussion and outlook . . . . .	48
3.4.1	Model extension . . . . .	49
<b>4</b>	<b>Parameter inference for stochastic single-cell dynamics from cell-lineage data</b>	<b>53</b>
4.1	Background . . . . .	53
4.2	The model class considered . . . . .	55
4.3	The inference problem . . . . .	56
4.4	Recursive likelihood and state posterior propagation . . . . .	58
4.5	SMC for recursive likelihood approximation . . . . .	60
4.6	A pseudo-marginal MCMC sampler for parameter inference . . . . .	62
4.7	Application of the method to two example systems . . . . .	64

4.7.1	Example 1: A two-type branching process with dynamic readouts . . .	64
4.7.2	Example 2: Stochastic cell type switching . . . . .	70
4.8	Chapter discussion and outlook . . . . .	74
<b>5</b>	<b>Concluding remarks</b>	<b>77</b>
<b>A</b>	<b>Materials and Methods</b>	<b>83</b>
A.1	Bacterial growth conditions . . . . .	83
A.2	Host strain and plasmid construction . . . . .	83
A.3	Flow cytometry experiments . . . . .	89
A.4	Time-lapse microscopy experiments . . . . .	91
<b>B</b>	<b>Supporting figures and tables</b>	<b>97</b>
	<b>Bibliography</b>	<b>103</b>
