

Table of Contents

I. Abstract.....	1
II. Introduction	5
<i>Listeria monocytogenes</i> . General characteristics.....	7
Listeriosis in humans.....	7
Listeriosis in ruminants.....	8
Genetic diversity and subtyping of <i>L. monocytogenes</i>	9
Main virulence attributes of <i>L. monocytogenes</i>	10
Whole genome sequencing as a tool to study <i>L. monocytogenes</i> virulence and surveillance.....	13
Hypothesis and Aims.....	14
III. Results	15
Chapter 1. Genomic epidemiology of <i>Listeria monocytogenes</i> in farm animals in Switzerland.....	17
Chapter 2. Genetic separation of <i>Listeria monocytogenes</i> causing central nervous system infections in animals.....	41
Chapter 3. <i>deltaRpkM</i> : an R package for a rapid comparative identification of genes involved in a phenotype	67
IV. General Discussion and Outlook	77
General discussion	79
Outlook.....	81
V. References	83
VI. Acknowledgements	93
VII. Curriculum Vitae	97
VIII. Declaration of Originality.....	103
