

Table of contents

- 1. List of abbreviations 3**
- 2. Abstract 8**
- 3. Introduction 10**
 - 3.1. Oncogene addiction 10**
 - 3.1.1. Oncogene addiction: Definition and implications..... 10
 - 3.1.2. Oncogene addiction in basic research 10
 - 3.1.3. Oncogene addiction in the clinic..... 13
 - 3.2. Role of RTKs in oncogene addiction: focus on MET and EGFR 17**
 - 3.2.1. Receptor tyrosine kinase MET..... 17
 - 3.2.2. Receptor tyrosine kinase EGFR 26
 - 3.3. The DNA damage response as paradigm of cellular circuitry intersecting with RTK systems 39**
 - 3.3.1. The DNA damage response 39
 - 3.3.2. IR-induced effects on the cellular apparatus: an exploitable anticancer strategy . 40
 - 3.4. Cancer energetics and metabolism at the mercy of activated oncogenes 46**
 - 3.4.1. Warburg and beyond 46
 - 3.4.2. Metabolic remodelling is driven by oncogene activation..... 47
 - 3.4.3. Role of mitochondria in tumorigenesis: not only secondary bystanders..... 50
 - 3.5. Mass spectrometry-based proteomics..... 54**
 - 3.5.1. Mass spectrometry applied to cancer research: oncoproteomics in action..... 57
 - 3.5.2. Oncoproteomics: focus on cancer-related phosphoproteome 58
- 4. Hypotheses and aims..... 61**
- 5. Results 63**
 - 5.1. A shared phosphorylation pattern for oncogene addiction may reveal pathways of response..... 63**
 - 5.1.1. Abstract..... 64
 - 5.1.2. Introduction..... 64
 - 5.1.3. Material and methods 67
 - 5.1.4. Results..... 73
 - 5.1.5. Discussion 94
 - 5.2. Oncogene addiction may underlie extensive rewiring of the mitochondrial proteome..... 102**
 - 5.2.1. Abstract..... 103
 - 5.2.2. Introduction..... 103
 - 5.2.3. Material and methods 105
 - 5.2.4. Results..... 109
 - 5.2.5. Discussion 122
 - 5.3. Identification of a MET-eIF4G1 translational regulation axis that controls HIF-1 α levels under hypoxia..... 136**
 - 5.3.1. Abstract..... 137
 - 5.3.2. Introduction..... 138
 - 5.3.3. Material and methods 139
 - 5.3.4. Results..... 144
 - 5.3.5. Discussion 159

5.4. Deciphering MET-dependent modulation of cellular responses to ionizing radiation by quantitative phosphoproteomics 173

 5.4.1. Abstract 174

 5.4.2. Introduction 175

 5.4.3. Materials and methods 176

 5.4.4. Results 182

 5.4.5. Discussion 198

6. Discussion, outlook & perspectives..... 211

7. Curriculum vitae and list of publications..... 216

8. References 219

9. Acknowledgments 261
