

Table of Contents

Chapter 1	1
Introduction	1
1.1. Nanoparticle functionalization	3
1.1.1. Fluorescence	5
1.2. Colloidal stability	9
1.2.1. Van der Waals forces	9
1.2.2. Electrostatic interactions and electrostatic double layer	12
1.2.3. Derjaguin, Landau, Verwey, and Overbeek theory	13
1.3. Nanomaterials interactions with cells	16
1.3.1. Nanoparticle physicochemical properties that determine nanoparticle–cell interactions	18
1.3.2. Cellular uptake and fate of nanomaterials	26
1.4. References	37
Chapter 2	52
Aims	52
2.1. Intracellular/lysosomal behavior and stability of the dye labelled AuNPs	53
2.2. Influence of the NP surface charge and material on intracellular stability	54
2.3. Influence of surface bound fluorescent dye on the interactions with biomolecules and resulting uptake of AuNPs	55
2.4. Lock in thermal imaging as a label free method for AuNP detection in cells	56
2.5. References	57
Chapter 3	58
Assessing the Stability of Fluorescently Encoded Nanoparticles in Lysosomes by Using Complementary Methods	58
Abstract	60
3.1. Introduction	60
3.2. Results and Discussion	61
3.3. References	70
3.4. Experimental Procedures	73
3.5. Supporting information	78
Chapter 4	89

Intracellular stability of nanoparticles influenced by the polymer charge and core material	89
Abstract	91
4.1. Introduction	91
4.2. Materials and methods	93
4.3. Results	99
4.4. Discussion	108
4.5. References	114
4.6. Supporting information	118
Chapter 5	129
How the coupling of fluorescent dyes to the surface of nanoparticles can influence nanoparticle–cell interactions: under or over-estimation of nanoparticle uptake	129
Abstract	131
5.1. Introduction	131
5.2. Results and discussion	132
5.3. References	142
5.4. Supporting Information	144
Chapter 6	164
Gold nanoparticles' thermal properties as a tool for nanoparticle intracellular detection	164
Abstract	166
6.1. Introduction	166
6.2. Materials and methods	168
6.3. Results and Discussion	171
6.4. References	186
Chapter 7	188
Investigation of NP–cell interactions using super-resolution microscopy	188
7.1. Introduction	190
7.2. Materials and methods	191
7.3. Results and outlook	193
7.4. References	202
Chapter 8	203
General discussion	203
Chapter 9	220
Conclusions and Outlook	220

Chapter 10	224
Acknowledgments	224
Chapter 11	228
Curriculum vitae.....	228
Chapter 12	232
Declaration of originality	232
