List of figures	13
List of tables	13
1 Introduction, Background and Objectives	14
1.1 Bandpass Filters	14
1.2 Piezoelectric RF-Filters	15
1.2.1 Piezoelectricity	15
1.2.2 Piezoelectric Resonators	18
1.3 Key Parameters of Resonators	26
1.3.1 Quality Factor	27
Sources of Loss	28
1.3.2 Coupling Factor	29
Piezoelectric Coupling Factor	30
Effective Electromechanical Coupling Factor	31
1.3.3 Figure of Merit	32
1.4 Thesis Objectives and Outline	32
2 From AlN to Al_{1-x}Sc_xN	34
2.1 AlN	34
2.2 AlN Thin Film growth	37
2.3 AlScN	39
2.4 AlScN Thin Film Growth	42
2.5 Ex-situ AlN Seed Layer for (0001)-textured Al _{0.85} Sc _{0.15} N Thin Film	47

2.6	Abnormal Grain Growth in AlScN Thin Films	53
3	Microfabrication	72
3.1	Process Flow Overview	72
3.2	Microfabrication Challenges	75
3.2.1	IBE	75
3.2.2	AlScN Thin Film Deposition on Patterned BE	80
3.2.3	Interdigitated Electrodes	81
3.2.4	Opening Access to the BE through the AlScN Film	82
3.2.5	Devices Release	84
3.2.6	Stress Control	87
4	Material Parameter Extraction for Complex AlScN Thin Film	90
4.1	Introduction	90
4.2	Device Fabrication and Characterization	93
4.3	Theory of Thickness Mode Resonances of Single Crystal Wurtzite	96
4.4	Microstructural analysis	100
4.4.1	Experimental Details of the TEM Tools and Methods	102
4.5	Analytical and FEM Models of the Composite Transducer	102
4.5.1	Analytical 1-Dimensional Model	102
4.5.2	FEM Model of 2.5 Dimensions	105
4.6	Conclusions	107
5	Al_{1-x}Sc_xN Lamb Wave Resonators	109
5.1	Membrane Type and SM-LWRs With Al _{0.85} Sc _{0.15} N Thin Film	109
5.2	Solidly Mounted Lamb Wave Resonators with Al _{0.7} Sc _{0.3} N Thin Film	118
6	Summary and Outlook	126
6.1	Summary	126
6.2	Outlook	129
	Bibliography	155
