Acknowledgements	v
Abstract (English/Deutsch)	vii
List of Figures	xii
1 Introduction	1
1.1 Contributions	7
1.2 Publications	7
1.3 Overview	8
2 Related Works	11
2.1 Material Design and Surface Rationalization	11
2.2 Deployable Structures	15
2.3 Conformal Mapping	16
3 Computational Design and Fabrication with Regular Auxetic Materials	19
3.1 Introduction	19
3.2 Regular Auxetic Linkages	21
3.2.1 Conformal Geometry	22
3.2.2 Cone Singularities for Regular Auxetics	24
3.2.3 Discrete Conformal Geometry	26
3.3 Surface Rationalization	28
3.3.1 Interactive Workflow	28
3.3.2 Numerical Optimization	30
3.4 Applications and Physical Prototypes	33
3.5 Discussion	37
4 Computational Design and Deployment of Programmable Auxetics	43
4.1 Introduction	43
4.2 Shape Space	45
4.2.1 Preliminaries	45
4.2.2 Inflation	46
4.2.3 Gravitational Deployment	48
4.2.4 Projection to Feasible Surfaces	49

Contents

4.3	Material Design	51
4.3.1	Uniqueness	52
4.3.2	Auxetic Linkages with Locally-Controlled Stretching	52
4.4	Material Optimization	53
4.4.1	Preprocessing	53
4.4.2	Conformal Flattening and Remeshing	55
4.4.3	3D Linkage Optimization	55
4.4.4	2D Linkage Optimization	57
4.4.5	Algorithm Parameters	58
4.4.6	Cone Singularities for Programmable Auxetics	58
4.4.7	In-plane Opening	59
4.4.8	Filling in the Surface	59
4.4.9	Verification by Simulation.	59
4.5	Results	62
4.5.1	Fabricated Prototypes	62
4.5.2	Application Case Studies	64
4.6	Additions and Remarks	66
4.7	Discussion	67
5	Forward Design of Deployable Auxetic Shells	71
5.1	Introduction	71
5.2	Design Space Exploration and Form-Finding	74
5.2.1	Algorithm	75
5.3	Application Case Studies	77
5.4	Discussion	81
6	Conclusion	85
6.1	Future Work	86
6.1.1	EPFL Shading Pavilion	86
6.1.2	Open Problems	86
A	Degrees of Freedom for a Trihexagonal Linkage	91
B	Inscribing Regular Linkage Triangles into Conformally Lifted Tiling Grid	93
C	Code for Non-penetration Constraint	95
D	Increasing Area Covered with Linkage	97
E	Abstracts of Other Published Work	99
	Bibliography	114
	Curriculum Vitae	115
