

# Table of Contents

Foreword .....	v
Acknowledgements .....	vii
Summary .....	xi
Résumé.....	xiii
Table of Contents.....	xv
List of figures .....	xxi
List of tables .....	xxvii
Glossary .....	xxix
Abbreviations .....	xxix
List of Symbols .....	xxxii

<b>Chapter 1 - Introduction.....</b>	<b>1</b>
<b>1 Context .....</b>	<b>3</b>
<b>2 Motivation and scope .....</b>	<b>4</b>
2.1 Restrained shrinkage and eigenstresses .....	4
2.2 Influence factors.....	8
2.3 Tensile response (resistance envelope) of SH-UHPFRC.....	9
2.4 Sustainability.....	11
<b>3 Objectives.....</b>	<b>12</b>
<b>4 Organization of the thesis .....</b>	<b>13</b>
References.....	14

<b>Chapter 2 - Tensile response of low clinker UHPFRC subjected to fully restrained shrinkage.....</b>	<b>19</b>
Abstract .....	19
<b>1 Introduction .....</b>	<b>21</b>
<b>2 Experimental.....</b>	<b>23</b>
2.1 Materials and preparation .....	23
2.2 Vibration Resonance Frequency Test (VRFT) .....	27
2.3 Isothermal calorimetry tests.....	28
2.4 Temperature Stress Testing Machine (TSTM) .....	28
2.5 Loading programs for the TSTM tests.....	29

<b>3 Results and discussion</b> .....	<b>31</b>
3.1 Development of dynamic elastic modulus.....	31
3.2 Heat of hydration .....	33
3.3 Temperature evolution in the TSTM.....	34
3.4 Development of autogenous deformations.....	36
3.5 Development of eigenstresses .....	40
<b>4 Conclusions</b> .....	<b>44</b>
<b>Acknowledgements</b> .....	<b>44</b>
<b>References</b> .....	<b>45</b>

**Chapter 3 - Tensile response of UHPFRC under very low strain rates and low temperatures**..... **53**

<b>Abstract</b> .....	<b>53</b>
<b>1 Introduction</b> .....	<b>55</b>
<b>2 Experimental</b> .....	<b>59</b>
2.1 Material.....	59
2.2 Uniaxial tensile test .....	60
2.3 Specimen shape and preparation .....	61
2.4 Test setup and loading .....	62
2.5 Acoustic emission tests.....	63
<b>3 Results and Discussions</b> .....	<b>63</b>
3.1 Overview of the tests .....	63
3.2 Effect of very low strain rates.....	66
3.2.1 Elastic limit .....	66
3.2.2 Elastic limit detection using Acoustic Emission measurements.....	67
3.2.3 Elastic modulus .....	70
3.2.4 Tensile strength .....	71
3.2.5 Strain at tensile strength .....	73
3.2.6 Hardening modulus .....	74
3.3 Effect of moderate to low temperatures .....	76
3.3.1 Age vs Maturity.....	76
3.3.2 Elastic limit .....	77
3.3.3 Elastic modulus .....	78
3.3.4 Tensile strength .....	78
3.3.5 Strain at tensile strength .....	79

3.4 Effect of mix type .....	80
3.4.1 Elastic limit and tensile strength.....	80
3.4.2 Elastic modulus.....	81
3.4.3 Strain at ultimate strength.....	82
<b>4 Analytical models</b> .....	<b>82</b>
4.1 Overview.....	82
4.2 Effect of strain rate on $f_{ute}$ .....	83
4.3 Effect of strain rate on $\epsilon_{Ltu}$ .....	85
<b>5 Conclusions</b> .....	<b>86</b>
<b>Acknowledgements</b> .....	<b>87</b>
<b>References</b> .....	<b>87</b>

**Chapter 4 - Modelling of the tensile behavior of SH-UHPFRC at low and high stress levels, under very low loading rates**..... **97**

<b>Abstract</b> .....	<b>97</b>
<b>1 Introduction</b> .....	<b>99</b>
<b>2 Viscoelastic – viscohardening model</b> .....	<b>101</b>
2.1 Overview.....	101
2.2 Incremental constitutive relationship.....	104
2.2.1 Below the elastic limit .....	105
2.2.2 Above the elastic limit.....	105
2.3 Summary .....	106
<b>3 Materials</b> .....	<b>106</b>
<b>4 Calibration of the model</b> .....	<b>107</b>
4.1 Overview .....	107
4.2 Calibration of $E_{tot,M1}$ – Vibration resonance frequency tests (VRFT).....	108
4.3 Calibration of M1 parameters, $E_k$ and $\tau_k$ – Full restraint tests in TSTM.....	109
4.4 Calibration of $E_{L,M2}$ and the influence of strain rates– uniaxial tensile tests.....	110
4.5 Calibration of M2 parameters, $E_l$ and $\tau_l$ – Non-linear relaxation tests in the hardening domain.....	113
4.6 Combination of M1 and M2 applied to TSTM results .....	114
<b>5 Applications and discussions</b> .....	<b>115</b>
5.1 Effect of degree of restraint on the development of eigenstresses.....	115
5.1.1 Modelling of tests with partial restraint.....	115
5.1.2 Parametric study – effect of degree of restraint.....	116

5.2	Relaxation behavior before the elastic limit .....	117
5.2.1	Comparison with literature.....	117
5.2.2	Parametric study.....	118
5.3	Relaxations in the linear and non-linear domain .....	119
5.4	Tensile creep.....	120
5.5	Incremental relaxation tests and loading history effect.....	121
5.6	Effect of early age hydration on the tensile response.....	122
5.7	Parametric study on the effect of very low strain rates on the tensile response.....	123
<b>6</b>	<b>Conclusions.....</b>	<b>127</b>
	<b>Acknowledgements.....</b>	<b>128</b>
	<b>References.....</b>	<b>128</b>
	<b>Appendix A.....</b>	<b>133</b>
	<b>Appendix B.....</b>	<b>137</b>

## **Chapter 5 - Influence of low curing temperatures on the tensile response of low clinker Strain-Hardening UHPFRC under full restraint..... 141**

<b>Abstract.....</b>	<b>141</b>
<b>1 Introduction.....</b>	<b>143</b>
<b>2 Experimental.....</b>	<b>145</b>
2.1 Materials.....	145
2.2 Isothermal calorimetry tests.....	148
2.3 Degree of hydration from <sup>29</sup> Si MAS NMR.....	148
2.4 Dynamic and static modulus of elasticity.....	149
2.5 Uniaxial tensile tests.....	149
2.6 Development of Autogenous deformations.....	150
2.7 Development of eigenstresses under full restraint.....	150
<b>3 Results and discussions.....</b>	<b>151</b>
3.1 Isothermal calorimetry.....	151
3.1.1 Heat of hydration.....	151
3.1.2 Maturity and activation energy.....	153
3.1.3 Double Danish model.....	154
3.1.4 Degree of hydration.....	156
3.2 Degree of hydration from <sup>29</sup> Si MAS NMR.....	158
3.3 Development of elastic modulus.....	162
3.4 Tensile resistance from uniaxial tensile tests.....	165

3.5	Development of autogenous deformations .....	166
3.6	Development of eigenstresses.....	171
<b>4</b>	<b>Material level vs Structural level.....</b>	<b>175</b>
4.1	Overview.....	175
4.2	Zone I.....	176
4.3	Zone II.....	177
4.4	Zone III.....	178
<b>5</b>	<b>Conclusions.....</b>	<b>178</b>
	<b>Acknowledgements.....</b>	<b>179</b>
	<b>References.....</b>	<b>179</b>
	<b>Appendix A.....</b>	<b>188</b>
	<b>Appendix B.....</b>	<b>190</b>

## **Chapter 6 - Conclusions and Outlook..... 193**

<b>1 Overview.....</b>	<b>195</b>
<b>2 Synthesis of main findings.....</b>	<b>195</b>
2.1 Influence of very low strain rates on the tensile response of SH-UHPFRC.....	195
2.1.1 Tensile response under monotonic strain rates.....	195
2.1.2 Tensile response under restrained shrinkage deformations.....	196
2.2 Influence of moderate to low curing temperatures on the kinetics of hydration and tensile response of SH-UHPFRC.....	196
2.2.1 Kinetics of hydration.....	197
2.2.2 Tensile response.....	197
2.3 Development of a viscoelastic-viscohardening model to predict the tensile response of SH-UHPFRC in the elastic and hardening domain.....	198
2.4 Influence of partial replacement of cement clinker with limestone filler.....	199
2.5 Overall conclusion.....	199
<b>3 Perspectives and future works.....</b>	<b>201</b>
3.1 Mix development.....	201
3.2 Material level investigation.....	202
3.3 Structural level investigation.....	202
3.4 Modeling.....	204
<b>References.....</b>	<b>205</b>

## **Curriculum Vitae..... 209**
