Abstract	iii
Résumé	v
Contents	vii
List of Figures	xiii
List of Tables	xv
1 Introduction	1
1.1 Motivation	1
1.2 Misinformation Debunking Framework and Research Questions	2
1.3 Thesis Methodology	4
1.4 Contributions and Thesis Organisation	4
1.5 Selected Publications	5
2 Background	7
2.1 Misinformation Landscape	7
2.1.1 Social Data and Social Platforms	7
2.1.2 A Taxonomy of Misinformation	8
2.2 Web Credibility	8
2.2.1 Information Extraction	8
2.2.2 Data Representation	9

2.2.3	Trust Computation	10
2.3	Misinformation Detection	12
2.3.1	Intradisciplinary Approaches	12
2.3.2	Interdisciplinary Approaches	13
2.4	Human-powered Validation	14
2.4.1	Human Validation Platforms	14
2.4.2	Human-powered Applications	18
2.4.3	Feedback Guidance	19
2.5	Data Visual Analytics	21
2.5.1	Social data visualisation	21
2.5.2	Streaming data management	21
2.5.3	Data summarisation	22
2.5.4	Exploratory Visual Analytics	22
3	Misinformation Detection: The Case of Rumour Early-Detection	23
3.1	Introduction	23
3.2	Motivating Example	25
3.3	Model and Approach	27
3.3.1	A Model of Social Platforms	27
3.3.2	Rumour Detection	28
3.3.3	Approach Overview	28
3.4	Local Anomaly Detection	30
3.4.1	Features to Identify Rumours	30
3.4.2	History-based Scoring	32
3.4.3	Similarity-based Scoring	33
3.4.4	Unified Scoring	34
3.5	Global Anomaly Detection	35
3.5.1	Anomaly Graph	35
3.5.2	Anomalousness of a Subgraph	35
3.5.3	Detection of a Most Anomalous Subgraph	37
3.6	The Streaming Setting	39
3.6.1	Incremental Anomaly Computation	40
3.6.2	Incremental Subgraph Detection	41

3.7	Empirical Evaluation	41
3.7.1	Experimental Setting	41
3.7.2	Data Collection	43
3.7.3	Understanding Rumour Characteristics	44
3.7.4	Effectiveness of Rumour Detection	46
3.7.5	Model Design Choices	47
3.7.6	Scalability and Streaming Settings	48
3.7.7	Case Study	50
3.8	Summary	51
4	Misinformation Validation: The Case of Minimal-Effort Fact-Checking	53
4.1	Introduction	53
4.2	Guided Fact Checking	55
4.2.1	Setting	55
4.2.2	Effort Minimisation	56
4.2.3	Outline of the Validation Process	56
4.3	Credibility Inference	57
4.3.1	A Probabilistic Model for Fact Checking	57
4.3.2	Incremental Inference with User Input	59
4.3.3	Instantiation of a Grounding	62
4.4	User Guidance	62
4.4.1	Uncertainty Measurement	62
4.4.2	Information-driven User Guidance	63
4.4.3	Source-driven User Guidance	63
4.4.4	Hybrid User Guidance	64
4.5	Complete Validation Process	65
4.5.1	The Algorithm	65
4.5.2	Robustness Against User Errors	65
4.6	Methods for Effort Reduction	66
4.6.1	Early Termination	67
4.6.2	Batching	67
4.7	Streaming Fact Checking	69
4.8	Evaluation	70

4.8.1	Experimental Setup	71
4.8.2	Runtime Performance	72
4.8.3	Efficacy of the CRF Model	72
4.8.4	Effectiveness of User Guidance	73
4.8.5	Robustness Against Erroneous User Input	73
4.8.6	Benefits of Early Termination	75
4.8.7	Benefits of Batch Validation	75
4.8.8	Streaming Fact Checking	76
4.8.9	Real-world Deployment	77
4.9	Summary	77
5	Misinformation Visualisation: The Case of Minimal-Regret Data Stream	
	Retaining	79
5.1	Introduction	79
5.2	Problem Statement	80
5.3	Model and Approach	81
5.3.1	A statistical model for social data	81
5.3.2	Utility of retained data	83
5.3.3	A simple retaining algorithm	85
5.4	A Progressive Retaining Algorithm	85
5.4.1	Updating the data sketch	85
5.4.2	Retaining data items	87
5.5	Empirical Evaluation	88
5.5.1	Experimental Setup	88
5.5.2	Efficiency	89
5.5.3	Effectiveness	89
5.6	Summary	90
6	Conclusion	91
6.1	Summary of the Work	91
6.2	Novelty and Limitations	92
6.3	Future Directions	93
	Bibliography	95
