About the Special Issue Editors	vii
Preface to “Turbulence in River and Maritime Hydraulics”	xi
Michele Mossa, Donatella Termini and Peter Davies	
Turbulence in River and Maritime Hydraulics	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 963, doi:10.3390/w10070963	1
Simone Ferrari, Maria Grazia Badas and Giorgio Querzoli	
On the Effect of Regular Waves on Inclined Negatively Buoyant Jets	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 726, doi:10.3390/w10060726	4
Laura Maria Stancanelli, Rosaria Ester Musumeci and Enrico Foti	
Computational Fluid Dynamics for Modeling Gravity Currents in the Presence of Oscillatory Ambient Flow	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 635, doi:10.3390/w10050635	22
Christy Ushanth Navaratnam, Jochen Aberle, Jie Qin and Pierre-Yves Henry	
Influence of Gravel-Bed Porosity and Grain Orientation on Bulk Flow Resistance	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 561, doi:10.3390/w10050561	40
Lorenzo Melito, Matteo Postacchini, Giovanna Darvini and Maurizio Brocchini	
Waves and Currents at a River Mouth: The Role of Macrovortices, Sub-Grid Turbulence and Seabed Friction	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 550, doi:10.3390/w10050550	56
Michele Mossa and Peter A. Davies	
Some Aspects of Turbulent Mixing of Jets in the Marine Environment	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 522, doi:10.3390/w10040522	85
Nadia Penna, Mauro De Marchis, Olga B. Canelas, Enrico Napoli, António H. Cardoso and Roberto Gaudio	
Effect of the Junction Angle on Turbulent Flow at a Hydraulic Confluence	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 469, doi:10.3390/w10040469	105
Didem Yılmaz, Ayşe Yüksel Ozan and Kubilay Cihan	
Flow Characteristics in the Wake Region of a Finite-Length Vegetation Patch in a Partly Vegetated Channel	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 459, doi:10.3390/w10040459	128
Paolo Peruzzo, Francesca De Serio, Andrea Defina and Michele Mossa	
Wave Height Attenuation and Flow Resistance Due to Emergent or Near-Emergent Vegetation	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 402, doi:10.3390/w10040402	144
Sara Pascolo, Marco Petti and Silvia Bosa	
Wave–Current Interaction: A 2DH Model for Turbulent Jet and Bottom-Friction Dissipation	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 392, doi:10.3390/w10040392	157

Diana De Padova, Maurizio Brocchini, Federica Buriani, Sara Corvaro, Francesca De Serio, Michele Mossa and Stefano Sibilla	
Experimental and Numerical Investigation of Pre-Breaking and Breaking Vorticity within a Plunging Breaker	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 387, doi:10.3390/w10040387	174
Gustavo Tomas, Tobias Bleninger, Colin D. Rennie and Henrique Guarneri	
Advanced 3D Mapping of Hydrodynamic Parameters for the Analysis of Complex Flow Motions in a Submerged Bedrock Canyon of the Tocantins River, Brazil	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 367, doi:10.3390/w10040367	191
Donatella Termini and Tommaso Moramarco	
Dip Phenomenon in High-Curved Turbulent Flows and Application of Entropy Theory	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 306, doi:10.3390/w10030306	210
Mouldi Ben Meftah and Michele Mossa	
Turbulence Measurement of Vertical Dense Jets in Crossflow	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 286, doi:10.3390/w10030286	220
Nikolaos Th. Fourniotis, Georgios M. Horsch and Georgios A. Leftheriotis	
On the Hydrodynamic Geometry of Flow-Through versus Restricted Lagoons	
Reprinted from: <i>Water</i> 2018 , <i>10</i> , 237, doi:10.3390/w10030237	244
Sandro Longo, Maria Clavero, Luca Chiapponi and Miguel A. Losada	
Invariants of Turbulence Reynolds Stress and of Dissipation Tensors in Regular Breaking Waves	
Reprinted from: <i>Water</i> 2017 , <i>9</i> , 893, doi:10.3390/w9110893	260
