Abstract	i
Zusammenfassung	iii
Acknowledgements	v
Contents	ix
1 Introduction	1
1.1 Motivation	1
1.2 Problem statement	4
1.3 Research questions	7
1.4 Method	8
1.4.1 Experiments	10
1.4.2 Computational tool-set for in situ robotic fabrication	11
1.4.3 Interdisciplinary approach	12
1.5 Structure of the thesis	13
2 Context	17
2.1 From the structured towards the unstructured	18
2.1.1 Principles of mechanisation in early construction robotics	18
2.1.2 The reprogrammable machine in architecture and digital fabrication	21
2.2 Robotic systems for in situ fabrication in architecture	24
2.2.1 Stationary robotic systems	25
2.2.2 Mobile robotic systems	29
2.3 Conclusion	39
2.3.1 Summary and conclusion	39
2.3.2 Current limitations and challenges	41
3 Experiments	47
3.1 Introduction	47
3.2 Computational tool-set for adaptive robotic control	49
3.2.1 Geometric-based closed-loop control	50
3.2.2 On-line communication system	55
3.3 Case Study 1: Stationary in situ loam aggregation	58
3.3.1 Objective	58
3.3.2 Introduction	58
3.3.3 Experimental robotic set-up	61

3.3.4	Building material system	64
3.3.5	Design objective and generative tools	68
3.3.6	Mapping, alignment and localisation	71
3.3.7	Fabrication surveying and adaptive control	73
3.3.8	Results and validation	76
3.3.9	Discussion	78
3.4	Case Study 2: Mobile in situ brickwork assembly	82
3.4.1	Objective	82
3.4.2	Introduction	82
3.4.3	Experimental robotic set-up	83
3.4.4	Building material system	85
3.4.5	Design objective and generative tools	86
3.4.6	Mapping, alignment and localisation	89
3.4.7	Adaptive control	93
3.4.8	Results and validation	95
3.4.9	Discussion	97
3.5	Case Study 3: Mobile in situ rebar assembly	100
3.5.1	Objective	100
3.5.2	Introduction	100
3.5.3	Experimental robotic set-up	103
3.5.4	Building material system	106
3.5.5	Design objective and generative tools	111
3.5.6	Mapping, alignment and localisation	117
3.5.7	Fabrication surveying and adaptive control	120
3.5.8	Results and validation	128
3.5.9	Discussion	132
4	Conclusion	141
4.1	Summary of experiments	141
4.2	Strategies for robotic in situ fabrication	142
4.2.1	Architectural scale	142
4.2.2	Accuracy	143
4.2.3	Discussion	145
4.3	Future Work	148
4.3.1	Mapping and alignment, localisation, and fabrication survey	149
4.3.2	Sensor feedback and adaptive fabrication control	150
4.3.3	Dynamic mobile fabrication strategies	151
A	The In Situ Fabricator	155
A.1	Introduction	155
A.2	Hardware set-up	157
A.3	Tectonic implications	159
A.4	Sensing, estimation and control solutions	160
A.4.1	Mapping, alignment and localisation	160
A.4.2	Fabrication survey	161

A.4.3	Navigation	162
B	Project Credits	163
B.1	In Situ Fabricator (IF)	163
B.2	Case study 1	164
B.3	Case study 2	165
B.4	Case study 3	166
	List of Figures	169
	List of Tables	173
	Bibliography	175
	Curriculum vitae	181
