PUBLICATIONS	iv
LIST OF FIGURES AND TABLES	viii
LIST OF ABBREVIATIONS	xi
SUMMARY	xiii
ZUSAMMENFASSUNG	xv
1 INTRODUCTION	1
1.1 Lipophilicity: A Fundamental Concept for Pharmacokinetic and Pharmacodynamic Assessment in Drug Discovery	1
Partition and Distribution Coefficients	4
Experimental Approaches to Determine Partition and Distribution Coefficients	6
<i>In Silico</i> Calculation of Partition- and Distribution-Coefficients	9
1.2 Peptides in Drug Discovery	13
Advantages and Drawbacks of Peptides	14
Overcoming the Drawbacks of Peptides by Combining Biotechnology and Medicinal Chemistry	15
Lipophilicity of Peptides and Peptide-Mimetics	18
1.3 Machine Learning for the Prediction of Pharmaceutically Relevant Properties	20
Molecular Representation	21
Unsupervised Algorithms	26
Supervised Algorithms	29
Model Evaluation	35
Applicability Domain	37
1.4 Evolutionary Algorithms	39
1.5 Protein-Protein Interactions in Drug Discovery	41
The Chemokine System	42

CCR7 and CCL19/CCL21	45
2 AIMS OF THIS THESIS	47
3 MATERIALS AND METHODS	49
3.1 Laboratory Methods	49
Peptide Synthesis	49
Peptide Analytics and Purification	51
Shake-Flask Method	51
Microscale Thermophoresis	53
3.2 Computational Methods	54
Software	54
Molecular Representation and Descriptor Calculation	55
Machine Learning	55
Datasets	56
<i>De Novo</i> Peptide Design	57
4 RESULTS AND DISCUSSION	59
4.1 Baseline Models	59
Introduction	59
Feature Selection and Dimensionality Reduction	60
Results for Modelling with Lasso Features vs. PCA Scores	63
Predictions from Baseline Models for Peptides up to a Length of Six AA	64
Discussion	66
4.2 Expanded Models	68
Introduction and Hypothesis	68
Results for Modelling LIPOPEP vs. AZ	68
Final Consensus Model based on the Pooled Data	71
Domain of Applicability	73
Discussion	76
4.3 Benchmarking the Final Consensus Model	80
Introduction and Hypothesis	80
Methods	80
Results	81
Discussion	85
4.4 Focussed <i>De Novo</i> Generated Peptide Libraries for Studying Chemokine- Receptor / Ligand Interactions	87
Introduction	87
Fragmentation of CCR7_C24A	89

<i>De Novo</i> Peptide Generation by <i>Simulated Molecular Evolution</i> and Ranking	90
Binding Affinities of Selected Offsprings	92
Discussion	93
5 CONCLUSIONS AND OUTLOOK	97
6 ACKNOWLEDGEMENTS	101
7 CURRICULUM VITAE	103
BIBLIOGRAPHY	107
A SUPPLEMENTARY INFORMATION	129
A.1 Supplementary Information to Chapter 1	129
A.2 Supplementary Information to Chapter 4.1	130
A.3 Supplementary Information to Chapter 4.2	153
A.4 Supplementary Information to Chapter 4.3	155
A.5 Supplementary Information to Chapter 4.4	156
