

Contents

1	General introduction	12
1.1	Fungal endophytes and their importance	12
1.2	Endophytic fungi of forest trees	13
1.3	Interactions of tree endophytes with pathogens	15
1.4	Ash dieback.....	17
1.5	Analysis of fungal endophytic communities – methods and challenges.....	19
1.6	Outline of the thesis.....	21
2	Exploring methods for an improved analysis of fungal endophytic assemblages.....	22
2.1	Abstract.....	22
2.2	Introduction.....	23
2.3	Materials and methods.....	24
2.3.1	In-silico validation of primers.....	24
2.3.2	PNA probe design and coverage analysis	24
2.3.3	Illumina amplicon sequencing of test samples.....	25
2.3.4	Bioinformatic analysis.....	26
2.4	Results	28
2.4.1	In-silico validation of primers.....	28
2.4.2	Quantitative precision	34
2.4.3	OTU diversity	36
2.4.4	Exclusion of plant amplicon.....	38
2.4.5	Influence of mismatches is position dependent	40
2.4.6	Biases due to unbalanced degenerate primer mixes	41
2.5	Discussion.....	44
2.5.1	Comparison of primers	44
2.5.2	PNA clamping.....	45
2.5.3	Amplification biases and possible strategies to avoid them.....	46
2.6	Supplementary Material.....	49
2.6.1	Supplementary Methods	49
2.6.2	Supplementary Results	52

3 The endophytic mycobiome of European ash and sycamore maple leaves.....	58
3.1 Abstract.....	58
3.2 Introduction.....	59
3.3 Materials and methods.....	62
3.3.1 Sites and sample collection.....	62
3.3.2 Processing of the leaf samples and fungal identification.....	62
3.3.3 Primer design and testing.....	63
3.3.4 DNA extraction, library preparation, and Illumina sequencing.....	65
3.3.5 Bioinformatic analysis.....	67
3.3.6 Statistical analyzes.....	68
3.4 Results.....	70
3.4.1 Validation of new primers.....	70
3.4.2 Endophytic mycobiota of ash and sycamore leaves.....	71
3.4.3 Comparison of classical cultivation and amplicon sequencing.....	74
3.4.4 High geographic variability.....	76
3.4.5 Host and tissue specificity.....	77
3.4.6 The ash dieback pathogen, endophytes and tree health.....	80
3.5 Discussion.....	82
3.5.1 Methodological considerations.....	82
3.5.2 Could ash endophytes go extinct?.....	83
3.5.3 Interactions with tree health.....	86
3.5.4 Conclusion.....	88
3.6 Data availability statement.....	89
3.7 Author contributions.....	89
3.8 Acknowledgments.....	89
3.9 Supplementary material.....	90
3.9.1 Supplementary methods.....	90
3.9.2 Supplementary Results.....	96
3.9.3 Supplementary Discussion.....	98
3.9.4 Supplementary Figures.....	101
3.9.5 Supplementary Tables.....	115
4 Effects of endophytic fungi on the ash dieback pathogen.....	123
4.1 Abstract.....	123
4.2 Introduction.....	124
4.3 Materials and methods.....	124
4.3.1 Inhibition of germination of <i>H. fraxineus</i> ascospores.....	124

4.3.2 Protective effect of endophytic fungi.....	126
4.4 Results.....	129
4.4.1 Inhibition of germination of <i>H. fraxineus</i> ascospores.....	129
4.4.2 Protective effects of endophytic fungi.....	129
4.5 Discussion.....	133
4.5.1 Inhibition of germination of <i>H. fraxineus</i> ascospores.....	133
4.5.2 Protective effect of endophytic fungi.....	135
4.6 Acknowledgements.....	137
4.7 Supplementary Material.....	138
4.7.1 Supplementary Results.....	138
4.7.2 Supplementary Methods.....	140
5 General discussion and outlook.....	141
5.1 Analysis methods - challenges and perspectives.....	141
5.2 The <i>Fraxinus</i> leaf mycobiome and its shaping factors.....	144
5.2.1 Spatial variability at different scales.....	144
5.2.2 Host species and genetic background.....	146
5.2.3 Ash dieback and endophytes: cryptic extinctions or protective effects?...	148
5.3 Outlook.....	151
6 Acknowledgements.....	154
7 References.....	156
8 Appendix.....	177
8.1 Additional preliminary experiments.....	177
8.1.1 Effects of leaf surface sterilization on different fungal groups.....	177
8.1.2 Influence of DNA extraction on diversity analyzes.....	186
8.1.3 Characterisation of the <i>F. excelsior</i> and <i>F. mandshurica</i> mycobiomes....	190
8.1.4 Host genotype and endophyte community composition.....	193
8.1.5 Utility for sequence handling.....	199
8.2 General surface sterilization protocol.....	200
8.3 Illumina sequencing protocol for samples employing PNA clamping.....	200
8.4 Overview of Illumina libraries.....	201
8.5 Abbreviations.....	202
