List of Figures	xix
List of Tables	xxv
Nomenclature	xxvii
1 Introduction	1
2 State of current research	7
3 Experimental Setup	11
3.1 GAMILO	12
3.2 HOMER	13
3.3 Instrumentation	15
3.4 Measurement campaign	16
3.5 Data processing	17
3.6 Measurement Uncertainties	22
3.7 Numerical Methods	30
3.7.1 Computational domain and inlet boundary conditions	31
3.7.2 Grids and numerical schemes for LES	32
4 Results and Discussion	35
4.1 Density stratified gas mixing with bulk Richardson number $Ri \leq 1/4$	35
4.1.1 Velocity and concentration	35
4.1.2 Turbulence quantities	37
4.1.3 Fluctuations of the transport scalar and turbulent concentration fluxes	40
4.1.4 Turbulence dynamics	43
4.2 Density stratified gas mixing with bulk Richardson number $Ri \geq 1/4$	47

CONTENTS

4.2.1	Velocity and concentration	47
4.2.2	Turbulence quantities	49
4.2.3	Fluctuations of the transport scalar and turbulent concentration fluxes	49
4.3	Non-Boussinesq effects	55
4.3.1	Eddy Viscosity	59
4.3.2	Eddy Diffusivity	60
4.3.3	Turbulent Schmidt number	62
4.3.4	Local densimetric gradient Richardson number	63
4.4	Coherent structures	65
4.4.1	Spatial two-point cross correlations of fluctuating quantities . . .	65
4.4.2	Spatial two-point auto correlations of variances	73
5	Flux turbidimetry	83
5.1	Verification of the method	88
6	Summary and Conclusions	93
	APPENDICES	96
A	Convergence of the results	97
B	The HOMER-GAMILO facility	101
C	Boundary conditions established by GAMILO	105
	Bibliography	109
