Abstract	v
Zusammenfassung	vii
List of Tables	xiii
List of Figures	xv
Abbreviations	xvii
1 Introduction	1
1.1 Human Brain Anatomy and Neurological Disorders	1
1.2 Deep Brain Stimulation	4
1.2.1 Surgical Procedure	5
1.2.2 Current Outcome	7
1.3 Thesis Outline	9
2 Robotics in Neurosurgery	13
2.1 Surgical Robots in Neurosurgery	13
2.1.1 Robotic Arms	14
2.1.2 Hand-held Surgical Robots	15
2.1.3 Telesurgical Robots	16
2.1.4 Flexible Continuum Robots	17
2.2 Tracking Technologies	19
2.2.1 Intraoperative Imaging Modalities	19
2.2.2 Sensing Technologies	20
2.3 Computer-Assisted Surgical Planning	21

3	Fluoroscopic Tracking	29	5	Neurosurgical Planning	79
3.1	Localization Using a Single View	30	5.1	Planning Approach	80
3.1.1	Position Estimation	30	5.1.1	Algorithm	80
3.1.2	Covariance Estimation	31	5.1.2	Cost Function	83
3.2	Combining Multiple Views	34	5.1.3	Discussion	85
3.3	Tracking Ablation Catheters	36	5.2	Surgical Constraints	88
3.3.1	Experimental Setup	36	5.2.1	Anatomical Constraints	88
3.3.2	Calibration	37	5.2.2	Physical Constraints	88
3.3.3	Results	39	5.3	Results	89
3.4	Tracking DBS Electrodes	42	5.3.1	Anatomical Obstacles	89
3.4.1	Surgical Procedure	43	5.3.2	Path Planning for Targeting Subthalamic Nucleus	89
3.4.2	Localization from a Single Fluoroscopic Image	44	5.3.3	Path Planning for Targeting the Fornix	92
3.4.3	Results	45	5.4	Discussion	93
3.5	Discussion	47	6	Conclusion	97
4	Magnetic Guidance of a Flexible Needle	51	A	Holographic Tracking for Microrobot	101
4.1	Modeling of a Magnetic Needle	52	A.1	Motivation	101
4.1.1	Magnetic Manipulation	52	A.2	Digital Holography Background	103
4.1.2	Kinematic Model of a Magnetic Needle	54	A.3	Tracking Algorithm	105
4.2	Feedback Control	57	A.3.1	Image Preprocessing	106
4.2.1	Chained System	57	A.3.2	Axial Position Estimation	108
4.2.2	Nonlinear Error Equation	60	A.3.3	Lateral Position Estimation	109
4.3	Experimental Setup	62	A.4	Experiments	110
4.3.1	Magnetic Needle Design and Fabrication	63	A.4.1	Experimental Setup	110
4.3.2	Brain Phantom Tissue	64	A.4.2	System Calibration	111
4.3.3	X-ray Fluoroscopic Visual Feedback	65	A.4.3	3D Closed-loop Position Control	112
4.3.4	Magnetic Manipulation	66	A.5	Discussion and Conclusion	115
4.3.5	Experimental Calibration	66	Curriculum Vitae		121
4.4	Experimental Results for Trajectory Following	70			
4.4.1	Experiments with Brain Phantom	70			
4.4.2	Experiments with <i>ex vivo</i> Pig Brain	73			
4.5	Discussion	74
