Abstract	5
Zusammenfassung	7
1. Introduction	11
2. Electron beam collimation with a photon MLC for standard electron treatments	23
3. A dosimetric evaluation of different levels of energy and intensity modulation for inversely planned multi-field MERT	55
4. Simultaneous optimization of photons and electrons for mixed beam radiotherapy	79
5. Part 1: Optimization and evaluation of dynamic trajectory radiotherapy	113
6. Part 2: Dynamic mixed beam radiotherapy (DYMBER): Photon dynamic trajectories combined with modulated electron beams	143
7. Discussion	177
8. Conclusions	187
