Abstract	III
Zusammenfassung	V
Acknowledgements	VII
List of Figures.....	XIII
List of Tables.....	XV
List of Abbreviations	XVI
1 Introduction.....	1
1.1 Carboxypeptidases	1
1.1.1 Carboxypeptidases	1
1.1.2 Functional role of carboxypeptidases in health and diseases	2
1.1.3 Protease targeted therapeutics	5
1.1.4 Aebp1	7
1.2 L-Cells.....	10
1.3 White and brown adipose tissue	13
1.3.1 Anatomy and function of the white adipose tissue.....	13
1.3.2 Anatomy and function of the brown adipocyte function	15
1.3.3 Adipocyte differentiation	17
1.3.4 Therapeutic potential of Aebp1	20
1.4 Adrenal	21
1.5 Vascular smooth muscle cells	22
1.6 Aims of study	22
2 Results	24
2.1 The role of Aebp1 in L-cells	24
2.1.1 Global proteomic profiling of L-cell secretome and surfaceome.....	24
2.1.2 Screen to identify proteases regulating L-cell activity	26
2.1.3 Aebp1 regulates GLP-1 secretion and production in intestinal immortalized L-cells	28
2.1.4 Aebp1 gene expression in mice and primary intestinal L-cells.....	31
2.2 Characterization of Aebp1 and its role as a secreting factor.....	33
2.2.1 The existence of one Aebp1 isoform	33
2.2.2 Generation of mCherry- and Myc-tagged full-length Aebp1 for in vivo tracing	34

2.2.3	Induction of recombinant Aebp1 production in mouse liver	35
2.2.4	Screening for tissue binding to foreign Aebp1.....	36
2.2.5	Aebp1 accumulation on the surface of the adrenal cortex and the brown adipose tissue 38	
2.2.6	Endogenous Aebp1 is circulating in human blood.....	42
2.2.7	Aebp1 forms homotypic multimer	43
2.3	Characterization of Aebp1 and its role as an active protease.....	44
2.3.1	Generation of point mutated and truncated Aebp1.....	44
2.3.2	Purification of wild-type and mutated recombinant Aebp1	45
2.3.3	Effect of Aebp1 mutation on its enzymatic activity.....	46
2.4	Aebp1 null mice.....	47
2.4.1	Generation of Aebp1 knockout allele in a mixed genetic background.....	47
2.4.2	Metabolic characterization of Aebp1 null mice	49
2.5	Functional characterization of Aebp1 conditional knockout mice.....	53
2.5.1	Aebp1 conditional allele	53
2.5.2	The role of Aebp1 in adipocyte function and differentiation.....	56
2.5.3	The role of Aebp1 in adrenal function.....	63
2.5.4	The role of Aebp1 in blood pressure regulation.....	64
3	Discussion.....	67
3.1	The role of Aebp1 in L-cell function.....	67
3.2	Aebp1 as a secreting factor	69
3.3	Aebp1 catalytic activity	73
3.4	Functional role of secreted Aebp1 in vivo	74
4	Material and methods.....	78
4.1	Antibodies	78
4.2	Plasmids	78
4.3	Adenovirus	79
4.4	Mass Spec glycocapturing.....	80
4.4.1	MS sample preparation	80
4.4.2	LC-MS and database analysis	81
4.5	Tissue culture.....	81
4.5.1	Cell lines and in vitro experiments.....	81
4.5.2	siRNA screen in STC-1 cells.....	82
4.5.3	LOF and GOF in cell lines.....	82

4.6	Total RNA isolation and RT-qPCR.....	83
4.7	Northern Blot analysis	85
4.8	Immuno-Histology.....	86
4.8.1	Immunofluorescence staining.....	86
4.8.2	Bodipy stainings	86
4.8.3	Oil Red O stainings.....	86
4.8.4	H&E stainings	87
4.9	Western Blot analysis	87
4.10	Native PAGE.....	88
4.11	Fluorometric measurements	89
4.12	Immunoprecipitation of endogenous Aebp1	89
4.13	Co-Immunoprecipitation of unique Aebp1 fusion proteins	90
4.14	Production and purification of recombinant human Aebp1	91
4.15	Enzymatic activity assay	92
4.16	Experimental Animals.....	93
4.16.1	Housing and diet	93
4.16.2	Aebp1 specific strains	93
4.16.3	Induction of recombination.....	94
4.16.4	Genotyping	94
4.17	Metabolic tests and in vivo procedures.....	95
4.17.1	Adenoviral experiments in mice	95
4.17.2	Blood glucose measurements, IPGTT, ITT.....	96
4.17.3	Plasma isolation	96
4.17.4	GLP-1 measurements in mice.....	96
4.17.5	Body temperature.....	97
4.17.6	Food intake, activity, EE, O2 consumption.....	97
4.17.7	Plasma lipid profiling	97
4.17.8	DEX-ACTH challenge test.....	97
4.17.9	Blood pressure measurement.....	98
4.18	SVF isolation and primary adipocyte differentiation	98
4.19	Statistical analysis.....	99
5	Supplementary information	100
5.1	Catalogue of mouse intestinal L-cells N-linked glycoproteins	100
5.2	Catalogue of human intestinal L-cells N-linked glycoproteins.....	107
