

Table of Contents

Summary	I
Acknowledgments.....	IV
Table of Contents.....	VI
List of Abbreviations	VIII
1. Introduction.....	1
1.1. Malaria disease burden	2
1.2. Human malaria parasites and the <i>Plasmodium falciparum</i> life cycle.....	2
1.2.1. Pre-erythrocytic life cycle.....	3
1.2.2. Asexual blood stage	3
1.2.3. Sexual stage and mosquito stage.....	5
1.3. Vaccine approaches and adjuvants	5
1.4. Germinal centres and follicular T helper cells	8
1.5. Malaria vaccine development	10
1.5.1. Pre-erythrocytic stage subunit malaria vaccine development.....	11
1.5.2. Asexual blood stage vaccines	12
1.6. The P27A asexual blood stage vaccine candidate	13
1.7. Aims of this thesis.....	14
2. The Candidate Blood-stage Malaria Vaccine P27A Induces a Robust Humoral Response in a Fast Track to the Field Phase I Trial in Exposed and Nonexposed Volunteers	15
3. GLA-SE improves quality and magnitude of cellular immunity to the blood stage malaria vaccine candidate P27A	25
4. The adjuvant GLA-SE promotes human Tfh cell expansion and emergence of public TCR clonotypes	56
5. Lymph node excision biopsy to study germinal center responses upon infection or vaccination in rural Tanzania.....	76
6. General Discussion	87
6.1. The Candidate Blood-stage Malaria Vaccine P27A Induces a Robust Humoral Response in a Fast Track to the Field Phase I Trial in Exposed and Non-exposed Volunteers	88
6.2. GLA-SE improves quality and magnitude of cellular immunity to blood stage malaria vaccine candidate P27A	89
6.3. The adjuvant GLA-SE promotes human Tfh cell expansion and emergence of public TCR clonotypes	90

6.4. Lymph node excision biopsy to study germinal centre residing T cell subsets in rural Tanzania	91
7. Outlook	93
8. References.....	96
9. Curriculum Vitae	103
