

Table of Contents

General Abstract	5
Abbreviation	10
1. General Introduction	13
1.1 Peptide Chemistry	13
1.2 Dendrimer	14
1.3 Peptide Dendrimers	15
1.4 Bacteria	16
1.5 Multidrug-resistant Bacteria	16
1.6 Antimicrobial peptides and peptide dendrimers	18
1.7 Imaging techniques	20
1.7.1 Confocal microscopy	20
1.7.2 Super-resolution Microscopy	21
1.7.3 Transmission electron microscopy	22
2. Mechanism of Action of the Peptide Dendrimer G3KL against <i>Pseudomonas aeruginosa</i> ...	24
2.1 Abstract	24
2.2 Introduction	25
2.3 Results and Discussion	26
2.3.1 Synthesis of G3KL fluorescent probes	26
2.3.2 Carboxyfluorescein and dansyl at the core of the peptide dendrimer maintain the antimicrobial activity	28
2.3.3 Super-resolution and confocal microscopy imaging of <i>P. aeruginosa</i> exposed to fluorescently labelled G3KL	30
2.3.4 Time-Lapse Imaging of <i>P. aeruginosa</i> when treated with G3KL-Fluo	32
2.3.5 G3KL and its fluorescent derivatives induce strong cytoplasmic membrane depolarization at low concentration	37
2.3.6 Bacterial uptake of G3KL-Fluo	38
2.3.7 Cellular uptake of G3KL-Fluo in mammalian cells	42
2.3.8 G3KL and LPS interaction	44
2.4 Conclusion	50
3. Alterations Induced by Antimicrobial Peptides, Peptide Dendrimers, Cyclic and Bicyclic Peptides on Gram-negative Bacteria Observed by Transmission Electron Microscopy	52
3.1 Abstract	52
3.2 Introduction	53
3.3 Results and Discussion	59
3.3.1 Effects of known antibiotics	60

3.3.2	Peptide Dendrimers.....	61
3.3.3	Linear Peptides.....	69
3.3.4	Cyclic Peptides.....	71
3.3.5	Bicyclic peptides.....	71
3.4	Conclusion.....	75
4.	Antibacterial Prodrugs based on Reducible Disulfide Linker with Dual Antibiotic Target for Gram-negative Bacteria.....	77
4.1	Abstract.....	77
4.2	Introduction.....	77
4.3	Results and Discussion.....	79
4.3.1	A compound with dual target.....	79
4.3.2	Cysteine analog of G3KL, G2KL and SB1.....	81
4.3.3	Antimicrobial activity of the G3KL-, G2KL-, SB1-conjugates.....	83
4.4	Conclusion.....	89
5.	General Conclusion.....	90
6.	Experimental Part.....	93
6.1	Material and Reagents.....	93
6.2	Solid phase synthesis of peptide dendrimer.....	94
6.2.1	Synthesis of the peptide dendrimers.....	94
6.2.2	Synthesis of labelled dendrimer peptides.....	95
6.2.3	Cleavage.....	95
6.3	Synthesis and Characterization.....	96
6.3.1	Unlabeled and labeled peptide dendrimers.....	96
6.3.2	Peptide and peptide dendrimers-Ciprofloxacin conjugates.....	97
6.4	Microbiological Assays.....	103
6.4.1	Broth Microdilution Method.....	104
6.4.2	Time-kill assays.....	104
6.4.3	LPS competition assay.....	104
6.4.4	MIC with TCEP pre-incubation.....	105
6.4.5	Biofilm inhibition.....	105
6.4.6	Synergy between G3KL and Ciprofloxacin.....	105
6.4.7	NPN Membrane Permeability Assay.....	106
6.4.8	DiSC3(5) Membrane Depolarisation Assay.....	106
6.4.9	Quantification of bacterial uptake of G3KL-Fluo.....	107
6.5	Imaging experiments.....	108
6.5.1	Confocal STED Microscopy.....	108

6.5.2	Transmission Electron Microscope (TEM).....	109
6.6	Analytical Assays.....	110
6.6.1	G3KL Titration.....	110
6.6.2	Release Kinetics.....	110
6.7	Mammalian Cells Assays.....	111
6.7.1	Cell Culture.....	111
6.7.2	Cellular uptake of G3KL-Fluo in mammalian cells.....	111
6.7.3	Cellular Toxicity in HeLa and CHO cells.....	111
6.7.4	Determination of TNF- α expression by Murine Macrophages by Western Blot.....	112
7.	Bibliography.....	113
8.	Supplemental Information.....	126
9.	Communicated Results.....	137
10.	Additional Projects.....	140
