

Contents

1	Introduction	1
1.1	Jupiter and Icy Moons Explorer Mission	1
1.2	Submillimetre Wave Instrument	3
1.3	Motivation and Research Objectives	5
2	600 GHz Receiver Characterization	9
2.1	Introduction and Background	9
2.2	600 GHz Receiver Chain	11
2.2.1	Characterization of the LO Chain	14
2.2.2	Noise Temperature Characterization	16
2.2.3	Gain Stability Measurements	22
2.2.4	Frequency Switching Measurements	26
2.2.5	Sideband Ratio Measurements	30
2.3	Summary and Conclusion	33
3	Blackbody Calibration Target	35
3.1	Introduction and Background	35
3.2	Characterization of CIP Loaded Stycast 2850FT	38
3.2.1	Ambient Temperature Characterization	38
3.2.2	Cryogenic Temperature Characterization	45
3.2.3	Coefficient of Thermal Expansion	47
3.3	SWI Calibration Hot Load	48
3.3.1	Shaped Conical Blackbody Targets	52
3.3.2	Calibration Hot Load Design	54
3.3.3	Coherent Backscattering S_{11} Measurements	58
3.3.4	Investigation of Baseline Ripples	59
3.4	Water-Based Blackbody Target	63
3.5	Summary and Conclusion	66
4	Optical Coupling Network	69
4.1	Optical Design and Alignment Concept	69
4.2	Optics Breadboard Model	72
4.2.1	Characterization of the Polarizing Wire Grid	73
4.2.2	Characterization of the 600 GHz Feedhorn	76
4.2.3	Beam Pattern Measurements	80
4.3	Summary and Conclusion	85
5	Conclusion and Outlook	87

A Publications	91
A.1 First Publication	91
A.2 Second Publication	103
A.3 Third Publication	113
