Abstract 14

Zusammenfassung 16

1. General Introduction 19

1.1. Interactions in solid-state NMR . . . 19
1.2. Fast MAS NMR . . . 19
1.3. ^{1}H detection methods in solid-state NMR . . . 20
1.4. Recoupling . . . 22
1.5. Decoupling . . . 22
1.6. Hepatitis C Virus . . . 23

2. Wheat Germ extract cell-free expression 26

2.1. Introduction . . . 26
2.2. Results and discussion . . . 33
2.2.1. Wheat germ extract preparation . . . 33
2.2.2. DNA plasmid preparation . . . 34
2.2.3. Labeling and sensitivity efficiency estimation of cell-free WGE for NMR studies . . . 35
2.3. Conclusions and outlook . . . 52
2.4. Materials and methods . . . 53
2.4.1. WGE preparation . . . 53
2.4.2. DNA plasmid preparation . . . 54
2.4.3. Transcription . . . 55
2.4.4. Translation of [^{2}H,^{13}C,^{15}N] labeled ubiquitin . . . 56
2.4.5. Purification of [^{2}H,^{13}C,^{15}N] labeled ubiquitin . . . 56
2.4.6. Composition of buffers . . . 57
2.4.7. SDS-PAGE . . . 57

2.4.8. Western blotting . . . 57
2.4.9. Liquid-state NMR spectroscopy . . . 58
2.4.10. Isotope dilution . . . 58
2.4.11. Fluorescence absorption . . . 59

3. Cell-free expression, purification and reconstitution of NS5A constructs 60
3.1. Introduction . . . 60
3.2. Results and discussion . . . 65
3.2.1. Expression and purification of the D1 protein . . . 65
3.2.2. Expression and purification of the D1D2D3 protein . . . 68
3.2.3. Expression and purification of the AHD1 protein . . . 68
3.2.4. Reconstitution of the AHD1 protein with dialysis method . . . 75
3.2.5. EM studies of AHD1 in the proteo-liposome form prepared with the dialysis method . . . 77
3.2.6. Reconstitution of AHD1 with cyclodextrine complexation method . . . 79
3.2.7. Gradient ultracentrifugation studies . . . 81
3.2.8. EM studies of AHD1 in proteo-liposome form prepared with cyclodextrine complexation method . . . 83
3.2.9. Expression and reconstitution of AHD1 in the presence of daclatasvir . 86
3.2.10. Preparation of selective GYT labeled AHD1 . . . 87
3.2.11. Expression and purification of the FL NS5A protein . . . 88
3.2.12. Reconstitution of the FL NS5A protein . . . 89
3.3. Conclusion . . . 91
3.4. Methods and materials . . . 91
3.4.1. Transcription . . . 92
3.4.2. Translation of D1 . . . 92
3.4.3. Purification of D1 . . . 93
3.4.4. Translation of D1D2D3 . . . 93
3.4.5. Purification of D1D2D3 . . . 94
3.4.6. Sedimentation of D1D2D3 protein into a NMR rotor . . . 94
3.4.7. Translation of precipitated AHD1 . . . 94
3.4.8. Purification of precipitated AHD1 . . . 95
3.4.9. Translation of solubilized AHD1 . . . 95
3.4.10. Purification of solubilized AHD1 . . . 96

3.4.11. Translation of precipitated NS5A . . . 97
3.4.12. Purification of precipitated NS5A . . . 97
3.4.13. Translation of solubilized NS5A . . . 98
3.4.14. Purification of solubilized NS5A . . . 98
3.4.15. Reconstitution . . . 99
3.4.16. Analysis of reconstituted AHD1 with density gradient ultracentrifugation 100
3.4.17. SDS-PAGE, western blotting and silver staining gels . . . 101
3.4.18. Electron microscopy . . . 101

4. Solid-state NMR studies of NS5A constructs 102
4.1. Introduction . . . 102
4.2. Results and discussion . . . 103
4.2.1. Solid-state NMR studies of the D1D2D3 protein . . . 103
4.2.2. The AHD1 protein sample screening for solid-state NMR studies . . . 106
4.2.3. Resonance assignments of the AHD1 protein using ^{1}H detected experiments . . . 111
4.3. Conclusions . . . 126
4.4. Materials and methods . . . 126
4.4.1. Sample packing into a solid-state NMR rotor . . . 126
4.4.2. Molecular modeling of AHD1 construct . . . 126
4.4.3. Solid-state NMR spectroscopy . . . 127

5. Method development for protein back-bone and side-chain assignments at fast MAS NMR 135
5.1. Introduction . . . 135
5.2. Results and discussion . . . 140
5.2.1. Backbone assignment . . . 140
5.2.2. Side-chain assignment: transfer to aliphatic side chains . . . 143
5.2.3. Side-chain assignment: transfer to aromatic side chains . . . 148
5.3. Conclusions . . . 149
5.4. Materials and methods . . . 150
5.4.1. Sample preparation . . . 150
5.4.2. NMR spectroscopy . . . 150

6. Concluding remarks and outlook **154**
6.1. Summary 154
6.2. Outlook 156

Appendix **160**

A. Supplementary information to WGE cell-free expression **160**

B. Cell-free expression, purification and reconstitution of NS5A constructs **166**

C. Solid-state NMR studies of NS5A proteins **177**

D. Method development for protein back-bone and side-chain assignments at fast MAS NMR **180**
D.1. Optimization of selective pulse 180
D.2. Simulation with SIMPSON program 181
D.3. Bruker Topspin pulse program for selective TEDOR experiment 185

Bibliography **189**

Acknowledgments **214**

Currilum Vitae **217**

Publications **219**
