| Abstract | i |
| Zusammenfassung | v |
| Acknowledgements | ix |
| Contents | xi |
| Nomenclature | xv |
| 1 Introduction | 1 |
| 1.1 Current Primary Mg Production | 1 |
| 1.1.1 Mg Production via the Silicothermic Route..... | 2 |
| 1.1.2 Mg Production Via Electrolysis..... | 3 |
| 1.1.3 The Problematic Energy Requirements and CO ₂ Emissions Associated With Primary Mg Production | 4 |
| 1.2 Improving the Production of Primary Mg | 5 |
| 1.2.1 Alternative Mg Production Routes | 7 |
| 1.3 Thesis Outline..... | 11 |
| 2 Background | 13 |
| 2.1 The Controversially Discussed Reaction Mechanisms..... | 13 |
| 2.2 Effect of Reactant Morphology on the Rate of CTR..... | 15 |
| 2.3 Effect of Reactant Preparation on the Rate of CTR..... | 16 |
| 2.4 Effect of Catalysts on the Rate of CTR | 17 |
| 2.5 Equilibrium Composition of the CTR of MgO..... | 18 |
| 3 The Prevailing Reaction Pathway(s) | 23 |
| 3.1 Methodology | 23 |
| 3.1.1 The Principle | 23 |
| 3.1.2 Accounting for the Effects of Side-Reactions | 28 |
| 3.2 Experimental | 32 |
| 3.2.1 Program | 32 |
| 3.2.2 Materials..... | 33 |
| 3.2.3 Apparatus..... | 34 |

| | | |
|----------|--|-----------|
| 3.2.4 | Procedure..... | 36 |
| 3.2.5 | Calculations..... | 37 |
| 3.3 | Results and Discussion..... | 45 |
| 3.3.1 | Phase 1: O ₂ -Ar Sweep..... | 45 |
| 3.3.2 | Phase 2: CO ₂ -Ar Sweep..... | 47 |
| 3.3.3 | Phase 3: Ar and CO-Ar Sweeps..... | 50 |
| 3.3.4 | Discrimination of the Prevailing Reaction Pathway..... | 53 |
| 3.4 | Summary and Conclusions..... | 56 |
| 4 | Kinetics of Carbothermic Reduction of MgO Under Low Pressures.... | 57 |
| 4.1 | Experimental..... | 57 |
| 4.1.1 | Materials..... | 57 |
| 4.1.2 | Method for Kinetic Data Acquisition..... | 61 |
| 4.1.3 | Apparatus..... | 62 |
| 4.1.4 | Procedures..... | 64 |
| 4.1.5 | Data Processing..... | 67 |
| 4.2 | Results..... | 72 |
| 4.2.1 | Attestation of the Apparatus for Correct Kinetic Measurements..... | 72 |
| 4.2.2 | Effect of MgO Presintering..... | 77 |
| 4.2.3 | Effect of C/MgO Ratio..... | 80 |
| 4.2.4 | Effect of MgO and C Replenishment in the Course of CTR..... | 84 |
| 4.2.5 | Effect of MgO-C Blend Dilution With Al ₂ O ₃ | 84 |
| 4.3 | Discussion..... | 87 |
| 4.3.1 | Discriminating the Rate-Controlling Parameters During Stage 1..... | 87 |
| 4.3.2 | Speculations About the Control of the Rate of CTR in Stage 2..... | 90 |
| 4.4 | Summary and Conclusions..... | 91 |
| 5 | The Reactor Concept..... | 93 |
| 5.1 | Enhancing the Rate of CTR of MgO..... | 93 |
| 5.2 | Development of the Reactor Concept..... | 96 |
| 5.3 | Selection of the Particle Feeding System..... | 98 |
| 5.3.1 | Fluidized Bed Feeders..... | 98 |
| 5.3.2 | Mechanical Feeders..... | 99 |
| 5.3.3 | Conclusion..... | 100 |
| 5.4 | Selection of the Mixing System..... | 102 |
| 5.4.1 | Fluidized Bed Mixer..... | 102 |
| 5.4.2 | Mechanical Mixer..... | 102 |
| 5.4.3 | Conclusion..... | 105 |

| | | |
|-------------------|---|------------|
| 6 | Lab-Scale Reactor Design..... | 109 |
| 6.1 | The Particle Feeding System..... | 110 |
| 6.1.1 | Design Aspects of the Feed Screw..... | 112 |
| 6.2 | The Bath Recirculation System..... | 116 |
| 6.2.1 | Design Aspects of the Recirculation Screw..... | 118 |
| 6.3 | The Reactor Head..... | 125 |
| 6.4 | The Mg Precipitation Zone and the Reactor Bottom..... | 125 |
| 7 | Experimental Testing of the Lab-Scale Reactor..... | 129 |
| 7.1 | Materials..... | 129 |
| 7.1.1 | Preparation of the Reactant C..... | 129 |
| 7.1.2 | Preparation of the MgO-C Feedstocks..... | 132 |
| 7.2 | Experimental Setups and Procedures..... | 132 |
| 7.2.1 | Feeding System Tests and Calibration..... | 132 |
| 7.2.2 | Cold Flow Tests of the Bath Recirculation System..... | 134 |
| 7.2.3 | Hot Tests..... | 137 |
| 7.3 | Results and Discussion..... | 148 |
| 7.3.1 | Feeding System Tests..... | 148 |
| 7.3.2 | Cold Flow Tests of the Bath Recirculation System – C Powders..... | 153 |
| 7.3.3 | Cold Flow Tests of the Bath Recirculation System – C Granules..... | 172 |
| 7.3.4 | Hot Tests..... | 179 |
| 7.4 | Summary and Conclusions..... | 191 |
| 8 | Summary and Outlook..... | 193 |
| 8.1 | Summary..... | 193 |
| 8.2 | Outlook..... | 194 |
| 8.2.1 | Reaction Mechanism and Kinetics..... | 194 |
| 8.2.2 | Further Development of the Suggested Reactor Concept..... | 195 |
| Appendix A | Methods Employed for the Analysis of Solid Materials.. | 199 |
| A.1 | Weight Fraction of Impurities in the Solid Materials..... | 199 |
| A.2 | Properties of Solid Materials..... | 200 |
| Appendix B | The Limits for Unequal MgO and C Consumption by the CTR..... | 203 |
| B.1 | Extent of the Stoichiometric Coefficient ϵ | 205 |
| B.2 | Extent of the Stoichiometric Coefficient γ | 205 |
| Appendix C | Supporting Information for Chapter 3..... | 209 |
| C.1 | Experimental Program..... | 209 |

| | | |
|-----------------------------------|---|------------|
| C.2 | Outlet Molar Rates of Product Gases | 212 |
| C.3 | Repeatability of the Experimental Setup | 218 |
| C.4 | Effect of Atmosphere on MgO Sintering | 219 |
| C.5 | Assessment of the Average Effective Partial Pressures of Mg in the Hot Zone Based on the Experimentally Observed Mg Productions..... | 221 |
| C.6 | Assessment of the Partial Pressures of Mg in the Hot Zone Expected from the Equilibrium of MgO Dissociation and MgO Reduction with CO | 222 |
| Appendix D | Supporting Information for Chapter 4 | 227 |
| D.1 | Additional SEM and TEM Photographs | 227 |
| D.2 | Correction of the Product Gas for Gas Dispersion | 230 |
| Appendix E | Prediction of the Conveyor Throughput Rates..... | 235 |
| Appendix F | Photographs of Reactor Components..... | 239 |
