

# Contents

Abstract	i-iv
Chapter 1: Introduction	1
1.1 Generalities	
1.2 Principles and methods applied	
Chapter 2: Geological background	7
2.1 Pro-side foreland basins	
2.2 Retro-side foreland basins	
2.3 Syn-tectonic volcanic activity	
Chapter 3: Northern Alpine Foreland Basin	19
<i>Evaluating igneous sources of the Taveyannaz Formation in the Central Alps by detrital zircon U-Pb age dating and geochemistry</i>	
by Lu, G., Winkler, W., Rahn, M., Von Quadt, A., & Willett, S. D.	
Published 2018, Swiss Journal of Geosciences 111, 399-416	
Chapter 4: Source-to-Sink	47
<i>Restoring the source-to-sink relationships in the Paleogene foreland basins in the Central and Southern Alps (Switzerland, Italy, France) - a detrital zircon study approach</i>	
by Lu, G., Di Capua A., Winkler, W., Rahn, M., Von Quadt, A., & Willett, S. D.	
Revision submitted March. 2019 to International Journal of Earth Sciences	
Chapter 5: Basement exhumation	80
<i>Evaluation of exhumation in the central Alps during the Early Oligocene by detrital zircon U-Pb age and fission track double dating of the Taveyannaz Formation</i>	
by Lu, G., Winkler, W., Fellin G. M., Rahn, M., Willett, S. D., & Guillong M.	
Will be submitted to Earth and Planetary Science Letters	
Chapter 6: Summary	108
Appendix	110
Acknowledgments	170
Curriculum Vitae	171

## Appendix

1. CL photos	110
2. Zircon U-Pb ages	112
3. Geochemistry	116
4. Raman spectroscopy	118
5. Zircon U-Pb data	121
6. Zircon Hf data	158
7. Rare earth elements	160
8. LA-ICP-MS	163
9. Zircon fission track data	164
