

CONTENTS

1. General Introduction...	1
1.1 Niche	1
1.2 Traits	3
1.3 Density-dependence	4
1.4 Global Change	5
1.5 Overall aims of the thesis	5
1.6 References	6
2. Water inundation shapes species distributions in tropical forests	19
1.1 Abstract	19
1.2 Introduction	20
2.3 Methods	22
2.4 Results	32
2.5 Discussion	36
2.6 References	38
2.7 Appendix	44
3. Traits predict the tolerance of tropical tree seedlings to water-inundation	53
3.1 Abstract	53
3.2 Introduction	54
3.3 Materials and Methods	57
3.4 Results	64
3.5 Discussion	70
3.6 References	74
3.7 Appendix	81

4. Spatial patterns of flowering and community abundances affects the recruitment success of trees	89
4.1 Abstract	89
4.2 Introduction	90
4.3 Methods	94
4.4 Results	97
4.5 Discussion	98
4.6 References	103
4.7 Appendix	108
5. General Discussion	113
5.1 Assembling drought and inundation paradigms, is there a trade-off?	113
5.2 Inundation responses from nursery and field experiment	118
5.3 Adult and seedling wood density	120
5.4 Changes in wood density	121
5.5 Habitat patterns effecting seedling recruitment	127
5.6 Janzen-Connell and habitat effects in the field experiments	125
5.7 Summary	127
5.8 References	128
6.9 Appendix	134
6. Curriculum vitae	137
