

Content

Summary	3
Zusammenfassung	7
General introduction.....	13
Chapter 1:	
Global sensitivity analysis of a dynamic vegetation model: model sensitivity depends on successional time, climate and competitive interactions	29
Chapter 2:	
PET in the context of ForClim's water balance – Has the formulation by Thornthwaite and Mather served its time?	85
Chapter 3:	
Capturing ecological processes in dynamic forest models: why there is no silver bullet to cope with complexity.....	125
Chapter 4:	
Stand-scale climate change impacts on forests over large areas: transient responses and projection uncertainties.....	209
Synthesis.....	269
Acknowledgements	291
Curriculum vitae.....	292
